The world's first needle designed specifically for coded vinyl with low wear!

The DigiTrack is the perfect marriage of easy and function. You can now manupulate MP3's with the style and feel of a turntablist and the tradition of a turntable.

The DigiTrack responds to the generation of turntable DJs who make extensive use of timecoded vinyl applications, such as Serato (TM) and FinalScratch (TM). With DigiTrack's low wear design and tailored frequency response increase the lifespan of timecoded vinyl records, and provides high quality sound reproduction for playing conventional vinyl records as well.

DigiTrack also features excellent groove-handling capabilities for scratch and mix performance, as well as increased output voltage for improved TCV performance and better sound quality from your mixer's phono preamps.
