Šifra: 14192
Kategorija prozivoda: USB Zvučne kartice
Proizvođač: IK MULTIMEDIA

Cena: 9.000,00 rsd

Being a certified Apple MFi interface (“Made for iPhone and iPad,”) iRig Pre HD is guaranteed to work out of the box with all iOS devices using a Lightning connector including those that do not have headphone jack. The included Lighting cable allows for plug-and-play with Apple iOS devices while the USB cable connects Mac and PC computers offering the ability to record anytime and anywhere using your favorite dynamic, ribbon or condenser microphone models with phantom power (using batteries). Delivering exceptional, best-in-category sound quality with up to 96kHz/24-bit resolution and full, flat frequency response from 20Hz to 20kHz (+/- 1.5dB), iRig Pre HD is the bridge between the world of portable devices and the one of professional microphones for recording instruments, sound for media, video, speech, interviews, documentaries and more.

Its integrated, high quality Class A preamp ensures that you can easily record the full dynamics of the sound being captured by your microphone down to the finest details and with crystal-clear quality. The elegant multicolor LEDs will help you visually set the right amount of gain needed for your applications and will tell you whether phantom power is in use.

Your best mic’s best friend

iRig Pre HD allows you to record with astounding quality using your favorite XLR microphones on the go. This means you can easily achieve authentic studio sound with your portable device regardless of where you are. As a superb, flexible, high-resolution microphone interface for studio recording, film, radio, television and broadcast applications, iRig Pre HD packs an incredible amount of punch in an ultra-compact enclosure that you can easily carry with you and delivers outstanding results with even the most gain-hungry microphones. Its integrated, high quality Class A preamp ensures that you can easily record the full dynamics of the sound being captured by your microphone down to the finest details and with crystal-clear quality. The elegant multicolor LEDs will help you visually set the right amount of gain needed for your applications and will tell you whether phantom power is in use.

A versatile performer, in the studio and on the go

iRig Pre HD is a versatile performer in virtually every professional context. If you are a musician or a singer, you can use it with a dynamic microphone to mic up a guitar amp or to record amazing vocal takes with your trusted large condenser mic, (just engage the +48V phantom power and you are set). You can even use it with ribbon microphones to faithfully capture their gently rolled-off character. If you are a journalist or a correspondent, you now have a tool that allows you to capture ready-to-stream hi-res digital audio on your device during interviews, on-the-ground news reports and much more. If you

are a video-maker you can take advantage of iRig Pre HD’s ultra-compact portability (without adding significant weight to your bulky video equipment) to capture ready-to-use audio during a location shoot.

Cene su informativnog karaktera. Prodavac ne odgovara za tačnost cena iskazanih na sajtu, zadržava pravo izmena cena. Ponudu za ostale artikle, informacije o stanju lagera i aktuelnim cenama možete dobiti na upit. Plaćanje se isključivo vrši virmanski - bezgotovinski.
