MACKIE M-Caster Studio White - Podcast mikseta

Šifra: 17100
Kategorija prozivoda: Podcast Miksete
Proizvođač: MACKIE

Cena: 26.520,00 rsd

Simply plug in your favorite XLR mic, gaming headset, or 3.5mm lavalier mic, sweeten the sound with the onboard ContourFX and StreamFX, and you're ready to stream in minutes. The ContourFX provides fast sound-shaping and enhancement through its presets, letting you focus on your stream rather than your sound. If you want more creative effects, StreamFX offers fun voice-changing effects that are just as simple to use.

M•Caster Studio includes a variety of features such as dedicated headset and media player inputs, a built-in 4-pad sampler with 3GB of internal storage, and user selectable RGB lighting that looks amazing in any streaming setup. The built-in MixViewer color display makes adjustments and configuration a snap. The built-in combo XLR-1/4" mic input includes phantom power for using your favorite condenser microphone.

At a Glance
Pristine sound quality and unmatched flexibility in a sleek compact design
Use your favorite mic plus a headset, media player, and more
Pick the perfect vocal sound with selectable ContourFX Presets
StreamFX makes it easy to add the finishing touch with tons of fun voice-changing effects from which to choose

Connect directly to your smartphone’s headphone jack to both send and receive audio
View levels, settings, and more via the built-in MixViewer color display
The built-in Sampler allows you to transfer and store audio files directly on M•Caster Studio and trigger them via 4 dedicated buttons
RGB LED strip with a whole rainbow of user-selectable colors. You can even have it cycle through all the colors automatically.
Includes USB cable, 3.5mm TRS / aux cable, 3.5mm TRRS cable (for smartphones), and a power supply

Stream a Little Stream
M•Caster Studio was designed to make it easy to get great audio on your computer or smartphone for livestreaming and content creation. M•Caster Studio packs in all the tone shaping and connectivity you need without making things complicated.

For Content Creators
M•Caster Studio was created with content creators at the top of the list. Every feature from easy tone shaping and effects to plug-and-play operation and compact size makes M•Caster Studio the audio solution for which you've been looking. And with its sleek looks and RGB lighting, you'll want it proudly

displayed on camera during your next stream or video.

No Expertise Required
Sure, reading a thousand posts in forums on how to sound good on stream can be fun, but you don't have time for that. Let M•Caster Studio do the heavy lifting for you. Plug in, turn a few knobs to dial in your sound, and you're good to go.

Big Sound, Little Mixer
At the heart of a M•Caster Studio is some serious sound-shaping horsepower. Choose between an array of different ContourFX Presets that can add anything from thunderous depth to sparkly angelic tones to your voice, with the turn of a single knob. Dial it in just right with the ContourFX control on each channel. Try each profile preset and find your signature sound.

Choose Your Mood Lighting
Everyone knows that slick RGB lighting is what really makes your computer run faster (not really), so Mackie made sure that M•Caster Studio provides that extra LED-fueled oomph that you require. All along the bottom is an LED strip with tons of gorgeous colors from which you can choose.

The Finishing Touches
Want to add a little audio flair to your stream? How about punching up your vocals to get the hype train really moving? M•Caster makes it easy with fun StreamFX voice changing effects that you can activate at the turn of a knob. Get creative and turn your voice into a robot, or add some space with a massive reverb.

Size Matters
The smaller the better—M•Caster Studio's compact design makes it easy to find a perfect place on your desk for it to live.

USB Yourself
Just plug in with the included USB cable, tweak a couple software settings, and boom, you've got that M•Caster sweetness direct to your computer. Easily integrate a phone caller into your stream by utilizing the phone input, and automatic Mix Minus will make sure the caller hears only you without feedback from his or her own voice.

Delicious Sound Bites
Everyone loves a well-timed sound effect, sample, song, etc. and M•Caster Studio makes it easy to slide one into your stream. Store audio files directly on to M•Caster Studio and instantly play them back via four dedicated Sample Trigger buttons. Feeling inspired in the moment? Record an effect directly on to M•Caster Studio at any time.

Doesn't Look Like a Wireless Headset, But Loves to Act Like One
You are probably no stranger to Bluetooth. M•Caster Studio uses that tech to connect to any Bluetooth-compatible device to both receive and send audio, just like a wireless headset would. This is perfect for on-the-go streaming and recording or just eliminating a cable from your setup.

Seeing is Believing
Convenience is the name of the game with M•Caster Studio. And with its built-in color MixViewer display, getting your settings just right is easy.
