Cena: 59.880,00 rsd

PowerCube SPC Series is a range of self-powered subwoofers which comprises three models - the SPC-8 (8-inch), SPC-10 (10-inch) and SPC-12 (12-inch). All the three incorporate newly developed long throw bass drivers and the fastest balance-drive Class D power amplifiers and feature innovations to surpass its predecessors. While focused on functionality and a very significant price/quality correlation, these subwoofers will not

only well integrate into any beautiful homes but also elevate the impeccable performance of your existing setup to an unprecedented level.

Main Features:

- * A sensor situated atop the subwoofer cabinet perceives close proximity movement and illuminates the top-mounted controls allowing operation in a dim room.
- * The new PowerCubes can achieve lower bass extension (about 10Hz lower), with a wide 85dB dynamic range.
- * The sealed box design provides faster and more intensive bass response than the bass-reflex structure of the original.
- * The low pass filter slope is adjustable from 30Hz to 150Hz.
- * The upper bass roll-off slope is steeper hence produces purer bass.
- * Ample input and output connections are provided for versatility.

Specification

Description/Format	Active balanced-drive closed-box subwoofer system
Drive Units	1 x (12") 300mm cone long-throw
Frequency Response	30 - 120Hz \pm 3dB
Rated Power Output	400W
Peak Power Output	850W
Line Input Sensitivity	200mv for maximum output
Crossover Range	30 - 150Hz
Inputs	Stereo Line In (2 x RCA Phono) Mono (LFE) Line In (RCA Phono) Stereo Speaker Level In
Input Impedance	Line In: 10k Ω LFE: 5k Ω Speaker Level In: 1k Ω
Signal-to-noise ratio (S/N)	>85dB
Features	Phase inversion, Auto on-off built in
Dimensions (HxWxD)	442x400x355mm
Net Weight	15kg
Avg. Max Output @1m	117dB
Accessories	IFC power cord, spikes on standard plastic feet
