Key Features

High degree of pattern control allows designers and installers to effectively control dispersion for clearer, more intelligible sound.

When properly arrayed, the unique, tightly focused coverage of each ***SRU*** loudspeaker helps minimize the overlap zones often found in conventional arrays. The result is a clearer sound image, and reduced interference throughout the coverage area of the array.

Proprietary mid-range engine specifically for the demands of engineered sound systems. They deliver smooth response and high reliability.

Newly styled marine-grade birch wood enclosure provides greater durability and strength. Steel grilles with acoustic filter foam enhance appearance.

Enclosure and grille available in black. They can be painted to blend into almost any environment.

Sixteen steel rigging points (4 top, 4 bottom and 4 on each side) allow for convenient rigging.
