Proizvođač: SVS

Cena: 167.880,00 rsd

SVS SB-3000

Wattage: 800 (RMS)

Driver Size: 13"

Direction: Front-Firing

What We Like: Builds on everything SVS does well.

What We Don't: Large rooms may require two.

The SB-3000 is the newest subwoofer model from the American legends at SVS, and we think it deserves to retain the crown of Best High-End Sub. As good as the previous model, the PB16-Ultra, was, it was also huge, ungainly, and way too much for most people. The SB-3000 dispenses with those issues, taking everything the Ultra did well and housing it in a much more compact, affordable frame. Those with overly large rooms may need two of them to get the best sound, but for 90% of people, one of these will blow the damn walls off.

One aspect we'd like to highlight is the excellent DSP (Digital Signal Processing). It allows a virtually infinite level of tweaking, and means that you can get precise, controlled bass that still manages to ooze power. This sub particularly excels with movies and television, giving gunfire, explosions, and punches real weight in the low-end. It's another winner for SVS, and right now, the only question is where on earth they go from here.

Formidable All New SVS 13-inch Driver

Formidable All New SVS 13-inch Driver

All-new SVS 13-inch driver is the largest and most advanced available in this price range. The new design is packed with innovations to ensure incredible output and low frequency extension with accuracy in frequency response and pinpoint transient speed. A flat edge wound split-wind voice coil maximizes magnetism to ensure visceral, chest-pounding bass without sacrificing refinement or control. You're always feeling the full intensity of every song or scene with no distortion or limiting at all volume levels.

Massive Power with Precise Control

Massive Power with Precise Control

Conservatively rated at 800 watts RMS, 2,500 watts peak power Sledge STA-800D2 amplifier maximizes the full potential of the 13-inch driver with effortless power and absolute control. The innovative design combines the efficiency of a Class D amplifier with the ability to move colossal amounts of current through the fully discrete MOSFETs, enabling immense output with surgical precision resulting in outstanding real-world subwoofer performance at all drive levels.

New Rear Panel Intelligent Control Interface

New Rear Panel Intelligent Control Interface

Designed specifically for the 3000 Series Subwoofers, the Intelligent Control Interface (ICI) on the rear panel of the 3000 Series cabinets provide control options for the subwoofer's most critical functions. Adjustments can be made for volume based on listening preferences and content to achieve full and balanced bass response.

SVS Subwoofer Smartphone App

SVS Subwoofer Smartphone App

The 3000 Series subwoofer app is the most convenient way ever to control volume, access multiple DSP functions and program custom presets for one-touch tuning optimized for music, movies, gaming, and more. Adjust crossover frequencies, a three-band parametric EQ, polarity, room gain and more from your favorite seat.

SVS SB3000 Subwoofer Specification

Colour Finish	Premium Black Ash
Grille	Protective non-reso

Driver	Front-firing 13 inch
Amplifier	Rear-mounted amp
Cabinet Construction	Robust Medium Den
Cabinet Dimensions H-W-D	Without Grille 397m With Grille 397mm
Shipped Dimensions	(603mm) x (527mm)
Weight Unboxed	24.7kg
Shipped Weight	28.9kg
Included Accessories	Protective Non-Res High Current 6" Pow
