

Beyerdynamic TG H74c

Šifra: 09808

Kategorija proizvoda: Headset Mikrofoni

Proizvođač: Beyerdynamic

Cena: 31.080,00 rsd

Professional neckworn condenser microphone (supercardioid) for stage use

The TG H74c, designed for wireless operation, offers plenty of freedom of movement.

With a supercardioid polar pattern and compensated proximity effect, it is particularly suited for musical and theatre applications. Highly adjustable, exceptionally discreet, mountable on both sides and impressively small and rugged – what else could you want from a headset microphone? For wired operation at a phantom powering input, the optional CV 18 is necessary.

Available in both black and tan.

SCT:

Sound channelling before diaphragm as a treble resonator to optimise the high-frequency reproduction

Special sound openings to shape the polar pattern

Technical data

Price category	Professional
Transducer type	Electret condenser
Polar pattern microphone	Supercardioid

Microphone frequency response	40 - 20,000 Hz
Dimensions	Diameter: 7.7 mm; Length: 158 mm
