

EKS XP10 Par

Šifra: 4940

Kategorija proizvoda: DJ Kontroleri

Proizvođač: Nedefinisan

Cena: **15.480,00** rsd

VINYL EMULATION

The XP10 features a **4 1/2" high precision wheel** for pitch bending, cueing and scratching. The wheel is also used for track selection and realtime adjustment of the loop in/out points. The **touch sensitive** aluminium top of the wheel functions just like a **vinyl turntable**. Touching the top stops the music, allowing you to scratch or cue the track by rotating the wheel.

The black outer rim of the wheel functions as a **pitch bender**. By touching just the outer rim of the wheel, you can speed up or slow down the track.

PITCH SLIDER

The 100 mm pitch slider with **selectable pitch range** (8/16/32%) makes pitch and tempo adjustments easy and accurate.

With a touch of a button, pitch control can be set to either normal, **Time Stretching** or **Pitch Shifting** mode. When Time Stretching is enabled, moving the pitch slider changes the tempo without affecting the pitch of the sound. By enabling Pitch Shifting you can alter the pitch without affecting the tempo of the track.

INSTANT REVERSE

Thanks to the **low travel buttons** in the pad and fast response of the Bison sound engine, the reverse function works **without any delay whatsoever**. There is no loss of audio quality, tempo or pitch. The fact that it allows change of direction within any track or loop requiring no other functions like start or stop to be engaged before its execution, provides ample possibilities for creating imaginative effects. Add the fast action and scale of the pitch control and the choices have no end.

USER DEFINABLE CONTROLS

Four buttons, A, B, C, and D can be set to perform **configurable functions**. For example, they can be used for old-style pitch bending or jumping to predefined cue points. Each button can be changed **"on the fly"** while working with the player by opening the menu and selecting functions from a list. This represents a **"future proofing" philosophy** behind the design of XP10. With **free updates** your XP10 player has more years in it than hardware based products like cd players do.

COMPATIBILITY

Choose your favourite DJ application and plug in XP10. The XP10 is supported natively by an increasing number of major vendors. And thanks to the MIDI drivers, XP10 can be configured to work with just about any application imaginable.

FUTURE PROOF

Additional functionality will be provided by **software updates**. For example support for upcoming file formats such as MP3Pro will only require a **single download** from our web page. New features can be implemented on the hardware level by utilizing the four custom buttons. This makes the XP10 a totally future proof product.

XP10 Digital DJ Player

XP10 is a professional plug and play controller **for PC and Power PC based Mac**, aimed at the serious digital age DJs. It is a truly portable solution for DJs looking for top notch sound, professional level features and uncompromised build quality.

Just like with vinyl and serious DJ CD players, you can control the sound with your fingers and use the **high precision jog wheel** to cue or scratch. The programmable **Hot Keys** of XP10 allow you to maximize your creativity and control.

XP10 has an **integrated high quality USB sound card** with signal-to-noise ratio **better than 105 dB**. Using patented audio technology it will satisfy the needs of audio purists and music industry professionals.

The size? The XP10 controller can almost fit inside your pocket and weights **under 400 grams**. It changes the way of thinking about mobile DJ'ing. Still it is packed with all the features of the bigger and heavier DJ equipment. In XP10 the size is no compromise for quality. The solid build of XP10 guarantees a perfect performance every night.

XP10 comes with **EKS made Bison DJ software** but is also **certified Traktor DJ Ready**, which means 100% compatibility with Traktor DJ software. XP10 is supported natively by an increasing number of major software vendors and thanks to the MIDI support, you can unleash your creativity by combining XP10 with just about any application imaginable, be it audio, video or something else altogether.

XP10 can be directly connected to a club mixer via RCA connectors, thus eliminating the need for external soundcards. Just plug the XP10 to your mixer and computer and you are ready to go.

FEATURES

Intuitive Layout

The layout of XP10 was created in close co-operation with pro DJs to answer the demanding needs of playing "live".

Vinyl Emulation

The XP10 features a 4 1/2" high precision jog wheel for pitch bending, cueing and scratching. The jog wheel can also be used for track selection or real-time adjustment of the loop in/out points.

Pitch Slider

The 100 mm ALPS pitch slider with selectable pitch range (8/16/32%) makes pitch and tempo adjustments easy and accurate. With the Pitch Mode button, functions such as Time Stretching or Pitch Shifting can be selected on the fly.

Seamless Looping

Cue and loop points can be created and recalled by a push of a button.

User Definable Controls

Four buttons, A, B, C, and D can be set to perform configurable functions. For example, they can be used for old-style pitch bending or jumping to predefined cue points. This represents a "future proof" philosophy behind the design of XP10.

Hi-Fi Soundcard

Each XP10 contains a top quality, high RMS output soundcard with Burr-Brown DAC's and stereo RCA connectors.

XP Technical Specification

Frequency Response	4 Hz - 24 kHz
Signal-to-Noise Ratio	105 dB (EIAJ)
Total Harmonic Distortion + Noise	0.002% (EIAJ)
Audio Output	10 V (peak-to-peak)
	3.5 V (RMS)

Power Requirements	None (USB bus-powered)
Power Consumption	180mA typical
Dimensions (W x D x H)	140mm x 210mm x 25mm
Weight	370 g
Controls	22 low-travel buttons 4½" touch sensitive wheel 100mm pitch slider
Connectors	USB (connecting to PC) RCA audio outputs (stereo)
Requirements	Fully USB v.1.1 or v.2.0 compliant USB host
Package Dimensions (W x D x H)	155mm x 245mm x 75mm
Package Weight	670 g
Included in Package	USB cable Double RCA audio cable Software CD incl. Bison and MIDI driver Printed manual
