announcement out, even to zones where the local volume control is in the 'OFF' position!

If your amplifier has a 24 V priority output, it will send a 24 V signal when you push the talk button on the microphone. The 24 V signal will close a relay on the E-VOL60 volume control, and the signal will pass, even when the volume control is in the 'OFF' position. This can be very useful for emergency or evacuation messages.

The E-VOL60 is built on a universal chassis that easily can be integrated with Gira, Jung and Euro.

Type : Euro

Voltage : 100 Volt

Attenuation steps : 11 + "0"
