BEYERDYNAMIC LAGOON ANC EXPLORER

MAKE THE JOURNEY WORTHWHILE

The LAGOON ANC opens up a new world where perfect sound and technical intelligence meet. Simply sit back and enjoy soothing silence or immerse yourself in music, films or audio books. What makes the LAGOON ANC unique is that whether Active Noise Cancelling is activated or not it still sounds excellent.

EXCELLENT ACTIVE NOISE CANCELLING

What could be better than travelling and discovering the most exciting corners of the world? Through digital Active Noise Cancelling with hybrid technology the journey to your dream destination will also be much more relaxing. Two adjustable intensity levels block out disturbing ambient noise, and all of that without having to sacrifice an excellent sound experience. The sound demonstration is for illustrative purposes only. Deviations from the actual product performance are possible.

EXCELLENT SOUND WITH AND WITHOUT ANC

The LAGOON ANC offers the best in Bluetooth® transmission thanks to the latest audio codecs such as Qualcomm® aptX™, aptX™ Low Latency and AAC. Whether it's on an Android or iOS device you can look forward to exceptional sound quality. Even with the ANC deactivated or the cable plugged in, the LAGOON ANC sounds excellent.

UP TO 45H BATTERY LIFE

On top of that, the headphones have a battery life of up to 45 hours without ANC or 24.4 with it.

SPEECH INTELLIGIBILITY

For the clearest speech intelligibility the LAGOON ANC utilises Qualcomm® cVc™. Integrated voice prompts are available in both German and English. Nothing gets in the way of calling the folks back home, wherever you happen to be.

MOSAYC. ATTENTION TO DETAIL

Our sense of hearing is unique and changes over the course of our lives. Like a mosaic, some pieces of the sound picture get lost or they fade. The unique MOSAYC sound personalization by Mimi Defined™ compensates exactly this development and adjusts itself precisely to your hearing ability.

LIGHT GUIDE SYSTEM

Different coloured lights on the inside of the headphones help you to operate them. Simply take them off for a moment and glance at the colour for the current status of the battery level and Bluetooth® connection, or even to see which sides are left and right. While you wear the headphones, nobody around you will be disturbed by a flashing or lit status light.

COMPACT STORAGE

For easy transport, you can rotate the ear cups and fold them together. This way they can be stowed away in the convenient hard case, leaving the LAGOON ANC well protected as a compact companion.

YOUR PERSONAL ASSISTANT

By pressing the centre of the Lagoon ANC touchpad for approx. 2 seconds, you can activate the personal assistant on your smartphone or tablet (for example Siri® or Google Assistant™).

HIGH-QUALITY MATERIAL AND A HIGH LEVEL OF COMFORT

The comfortable design of the LAGOON ANC makes it the perfect companion. The circumaural cushioning made of high-quality memory foam and artificial leather is soft to the touch and follows the anatomy of the ear, making it extremely comfortable to wear. This creates a very effective over-ear seal and reduces ambient noise even without ANC. The high-quality spring steel headband sits comfortably on top of your head. Not too tight, but secure.

EASY TO USE

The touch panel on the right earpiece guarantees effortless use with the touch of a finger. [Learn more about the features.](#)
