

## FOCAL TRIO 11 RED

Šifra: 13664  
Kategorija proizvoda: Aktivni Studijski Monitori  
Proizvođač: Focal

Cena: **378.000,00** rsd

Thanks to its class G amplification, Trio11 Be delivers a high SPL (118dB at 1m) and offers a great versatility of use and installation configurations in nearfield AND midfield applications. A key asset, always coming along with an extremely precise sound reproduction and stereo image.

With an extended bandwidth (30 Hz-40 kHz), this loudspeaker is also composed of a 3-way monitor and a 2-way monitor, just like Trio6 Be, which lets you check the mix transfer sound quality thanks to FOCUS mode.

### KEY POINTS

High SPL: 118 dB @ 393/8" (1m).  
FOCUS Mode: two monitors in one with remote switchover.  
Pure Beryllium inverted dome tweeter: very low directivity, linearity, dynamics.  
'W' composite sandwich cone on woofer and subwoofer: neutral sound, no distortion.  
Bass, mid-bass and treble settings on rear panel: optimum acoustical integration.  
Optimised decoupling of the midrange speaker driver thanks to silent blocks.  
Ultra-low distortion and noise.

### ADJUSTABLE PLATE

The aluminium plate incorporating the tweeter and woofer is adjustable through 360°, in 90° increments, so the Trio11 Be can be used either vertically or horizontally.

This function makes it possible to optimise the monitor's performance based on its positioning in the room and the latter's acoustics.

### FOCUS mode 2 MONITORS IN 1

Trio11 Be combines two monitors in a single enclosure.

The 3-way monitor provides a flawless control of the entire audio spectrum (30 Hz - 40 kHz).  
The 2-way monitor, with a frequency response of 90 Hz to 20 kHz, makes it possible to check the transfer quality of mixes on systems with a limited frequency response in the bass (televisions, computers, cars, etc.).
