Cena: 14.744,00 rsd

Audience Blinder,2xPAR-36,blk, DMX,1-Ch

This high-quality stage version is more than just bright lights!

A real dud! Someone to trust blindly evidence of pronounced naivete, right? So based on our audience, this blind man can not really say, he has many merits, justify their full faith in him absolutely. The most striking feature - besides being extremely fast and extremely bright light displays - is it's already built-in dimmer, whose function is controlled manually via a dip switch is used. A significant advantage compared to many other Blindern, where the dimmers can be connected as an additional device is not integrated needs and level. The effect is designed for 2 120V/650W PAR-36 lamps, it can be controlled with two DMX channels and can be used on the ceiling and on the cross to be mounted.

DMX 512 control via regular DMX-controller

1 channel DMX controllable

Manual dimming via dip-switch

For 2 PAR-36 lamps 120V/650W

Each lamp is individually to an internal terminal block that can easily be wired so that any lamps

Extreme and lightning-fast light displays

Robust housing

Supplied with silicone cable and safety plug

Ceiling and truss mounting possible

Technical data

Power supply: 230 V AC, 50 Hz ~

Power consumption: 1200 W

Duration: 3 minutes

Cooling time: 3 minutes

Dimensions (LxWxH): 155 x 380 x 240 mm

Weight: 3
