

FOCAL KANTA N3 WALNUT VENER DARK MAT

Šifra: 13733
Kategorija proizvoda: Podnostojeći Zvučnici
Proizvođač: Focal

Cena: **659.880,00** rsd

Entirely dedicated to acoustic performance and with an incredibly original look: that, in a nutshell, is the Kanta DNA! After three years of research, Focal offers a new combination of exclusive Hi-Fi technologies: the marriage of **Beryllium**, in the next generation **IAL3 tweeter**, and **Flax**, for the midrange and bass speaker drivers.

Another strong point of the line is its bold look that puts the finishing touch on this acoustic masterpiece with a resolutely modern and bewitching design! With eight front panel finishes, gloss or matt, there are several possible combinations. So many different styles, each one so different from the next, means there's something for everyone. Kanta has become a veritable, ultra stylish, designer object that will become the star of your interior.

Marriage of materials

BERYLLIUM AND FLAX

For the very first time, a **Flax sandwich cone** speaker has been combined with a **Beryllium tweeter**. Flax is the answer to the low mass/rigidity/damping equation, leading to sound clarity and precision. This unique Flax/Beryllium combination gives music incredible warmth and musicality. Made in France, this patented flax cone has already proven itself in Focal home and in-car speakers. The midrange speaker uses **TMD** (Tuned Mass Damping) suspension, and every Kanta speaker is also equipped with an **NIC** (Neutral Inductance Circuit) motor, which stabilises the magnetic field for perfectly defined sound and better controlled bass.

Cabinet-work

HIGH DENSITY POLYMER

Everything is designed and made to create acoustic softness and warmth: the density and stiffness of the front panel and cabinet materials, softened angles and double port vents. The front panel is made of a new material to suit the acoustic parameters. It is moulded in one piece from High Density Polymer (HDP). This material has excellent performance: it is 70% denser than MDF, 15% stiffer and provides 25% more damping. The one-piece front panel totally eliminates any sound diffraction. Kanta incorporates Power Flow technology with two vents, on the front and rear faces, to limit bass compression.

New tweeter

DISTORTION IS THE ENEMY

Focal's research is geared towards reducing distortion in every register. With Kanta, the treble register is reproduced by a new pure Beryllium tweeter. This IAL3 tweeter combines the IAL (Infinite Acoustic Loading) and **IHL** (Infinite Horn Loading) tweeters features, both of which help with the absorption of waves, thus lowering the tweeter frequency.

Style

AND THAT'S ALL...

Our engineers have revisited their choice of **'Focus Time'**, which corrects speaker alignment, making them the same distance from the ear. The cabinet is made in one-piece integrally moulded wood. The Zamac base also brings out masses of character. With its spikes and cups, the base provides great stability from a very small footprint. Final details: the glass-covered top and magnetic grilles. When these are removed, they reveal the speakers' **flax cones**, the final design touch that gives Kanta its unique look.

Finishes

LATEST FASHION OR CLASSIC

A wide range of combinations are available to fit into every interior space. The cabinet is available in High Gloss black lacquer and Walnut. For each of these, there are four front panels colours, in two finishes. With the High Gloss black cabinet there are four front panels available: High Gloss Carrara White, Gauloise Blue, Solar Yellow and Black Lacquer. With the wood finish cabinet there are four front panels available: Ivory, Warm Taupe, Gauloise Blue and Dark Grey in Matt Finishes.
