Accurate and Rich Sound Reproduction

The SC-C30 is equipped with three units of Technics' original JENO Engine (Jitter Elimination and Noise-shaping Optimization) full-digital amp. The JENO Engine drives each speaker unit accurately and powerfully. Furthermore, the impulse response improvement technology, LAPC (Load Adaptive Phase Calibration), realises ideal speaker drive to deliver accurate and information-rich sound.

Faithful Sound Reproduction from Bluetooth® and Compressed Audio Sources

A technology is utilised that reproduces high-quality sound from compressed audio sources used in streaming music services, Internet radio and Bluetooth®. Technics' Re-master technology that uses a proprietary algorithm reproduces signals as close to the original audio source as possible, thus eliminating sound quality degradation that normally occurs in the reproduction of audio signals from compressed audio sources.

Optimally Balanced Sound for any Listening Environment Space Tune™

To provide the OTTAVA™ S SC-C30's excellent sound in every room and listening position, Space Tune optimises the listening environment to the sound space. In addition to offering 3 preset modes to suit the mounting location, a microphone built into the main unit enables an Auto function to optimise the sound and an iOS device can also be used to measure and compensate the frequency response with greater precision. This allows the user to enjoy higher sound quality regardless of where the unit is placed.

Three Presets

Free / Wall / Corner easily optimise the sound quality.

Auto

With a simple operation using the built-in mics of the SC-C30, the sound quality can be automatically optimised.

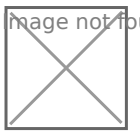
Precise Adjustment Using Technics Audio Center app (with iOS Device)

The app measures and compensates for frequency characteristics.



Elegant and Timeless Design

The OTTAVA™ S SC-C30 combines practical function with elegant design. The thick aluminium top panel increases the rigidity of the chassis, and the iconic OLED is surrounded by ring keys for easy operation. Rear louvers add further elegance while enhancing the function of an internal heat-reducing mechanism. And the beautiful arc form, which helps to eliminate unwanted vibration and standing wave in the chassis, incorporates acoustic technology to achieve a wide sound stage. This lets you freely place the OTTAVA™ S SC-C30 to suit the listening position. And you can also choose a black or white colour to match your room.

Complete Compatibility

In addition to USB playback and analogue/optical input, the OTTAVA™ S SC-C30 supports Bluetooth®, AirPlay, Chromecast built-in, Spotify, Tidal, Deezer, Internet Radio and Network Playback, allowing comfortable playback of a diverse range of music sources from a single unit. High connectivity also supports multi-room, stereo pairs*, and Wi-Fi, as well as iOS and Android control apps.

*The function of Apple AirPlay 2 for the C50 will be available with firmware update.

*Coming Soon

Multi-room and Stereo Pairing*

With a number of Chromecast built-in speakers, the variety of music streaming services can be played in several rooms, or different music can be played from room to room. (The Google Home App is required.)

In addition, if you use Technics Audio Center app and have another app compatible Technics / Panasonic devices, you can also enjoy other music source in multi-room such as Bluetooth, AUX, Optical input, USB, Internet radio and also OTTAVA™ SC-C30 compatible streaming music. If two OTTAVA™ S SC-C30s are arranged and set to stereo, you can enjoy highly ambient stereo sound.

Concept of Multi-room and Stereo Pairing

*The function of Stereo Paring will be available with firmware update.
