entertaining performance

Stream your favourite music and enjoy high-resolution digital audio files up to 192kHz/24bit or DSD5.6. Switch to the high quality Phono MM input to listen to your beloved vinyls as never before. The digital inputs support PCM audio, and decode - beside MP3 - lossless digital files like ALAC, FLAC and WAV up to 24-bit/192-kHz for high-resolution listening. USB-A and HEOS Built-in additionally support DSD 2.8MHz and 5.6MHz playback.

Stream your favourite music wirelessly via AirPlay2 and Bluetooth, and control the amplifier via the HEOS app or with leading voice agents Apple Siri, Google Assistant and Amazon Alexa where supported.

Hi-Res Audio Support

With the ability to decode hi-res audio ALAC, FLAC and WAV lossless files up to 24-bit/192-kHz, as well as DSD 2.8MHz and 5.6MHz tracks (the audiophile format of SACD), enjoy music exactly as the artist intended. Listen to your music via the rear panel USB port or over network sources.

Discrete Power Amplifier

Discrete Power Amplifier

Current Feedback amplification, a renowned Marantz-proprietary circuit technology, is thoughtfully designed to match the requirements of high resolution music for wide-bandwidth and high speed audio reproduction. The unique Marantz HDAM modules outperform the regular integrated op-amps dramatically in slew rate and noise level. The result is much more dynamic, accurate and detailed sound

Wide Connectivity

Wide Connectivity

The PM7000N is equipped with 4 analogue inputs and one analogue output, plus a high quality Marantz Musical Phono MM equaliser, and features one coaxial and two optical digital inputs, along with a USB-A input for high resolution audio files. The digital boards are shielded and can also be completely switched off independently using “Pure Modes” to avoid any interference.
