Onboard gain control and headphone level control

Comes with a full suite of IK apps

Includes portable tripod tabletop stand

Includes Lightning, Micro-USB OTG and USB cables

30-pin cable available separately

Custom ASIO driver for superior performance on Windows machines

iRig Mic Studio

Big sound, small size

What’s remarkable about iRig Mic Studio is that it offers its truly amazing recording quality in an enclosure that’s smaller than an iPhone. It features a large 1” diameter back electret condenser capsule, a 24-bit audiophile-grade A/D converter (with 44.1/48 kHz sample rate) and a built-in low-noise high-definition preamp. These, combined with its 133dB SPL rating, allow for optimal recording at any sound pressure level — it can capture everything from the subtle and nuanced dynamics of the human voice to the full-on bombast of an amplified electric guitar, and everything in between.

A full suite of controls

To ensure you'll always record at your best, iRig Mic Studio comes with a full set of flexible controls: It has a gain control knob and a multicolor LED level indicator. It also includes a headphone output with its own level control for onboard monitoring directly from iRig Mic Studio itself. And, for better positioning while recording, iRig Mic Studio comes with a sturdy and portable tabletop tripod stand.

All this is to say that iRig Mic Studio is equipped with everything you need to capture the highest quality sound no matter whether you're at home in the studio or recording while on the go.

iRig Mic Studio

It's all about the connections

iRig Mic Studio is compatible with all your favorite mobile and desktop platforms. It comes with a female micro-USB port and an assortment of cables: Micro-USB to Lightning for iPhone, iPad and iPod touch; micro-USB to micro-USB OTG for Android (requires an Android 5 device); and micro-USB to USB for Mac and PC. A micro-USB to 30-pin cable is available separately for older iPhone, iPad and iPod touch models.

iRig Mic Studio - connections

Record with the power of apps

For immediate recording, iRig Mic Studio comes equipped with a powerful suite of vocal apps that match its cross-platform compatibility.

devices

iPhone, iPad and iPod touch users will be able to enjoy VocaLive, a powerful effects processor and multi-track recording app that features a selection of 12 professional real-time vocal effects. EZ Voice for iPhone, iPad and iPod touch and EZ Voice for Android are streamlined and easy-to-use sing-along apps that make it easy for vocalists to practice with any song in their music library. iRig Recorder for iPhone, iPad and iPod touch and iRig Recorder for Android are straightforward apps for field recording, podcasting, note taking and more. Mic Room, the microphone modeling app for iPhone and iPad.

iRig Mic Studio is also fully compatible with a wide variety of third party apps and software, like Cubasis, ProStudio Vocal FX, MultiTrack DAW and more. It's also compatible with Apple's GarageBand and Logic Pro X apps, and iOS Voice Memo.

Specs

iRig Mic Studio Specifications

Microphone Type: condenser, back electret

Capsule Size: 1”

Polar Pattern: cardioid

Interface Type: USB digital microphone, built-in low-noise high-definition preamp

Frequency Response: 20Hz - 20kHz, -3dB

Gain Range: 40dB

Maximum Sound Pressure: 133dB

Sensitivity: -42±3dB at 1 kHz, 0dB=1V/Pa

Equivalent Noise Level, A-weighted: 11dB-A

Resolution & Sample Rate: 24 bit up to 48kHz recording

Connector Type: standard Micro-USB

Headphone Output: 3,5mm/1/8” jack

Power and Connection: powered by connected device

Controls: Built-in gain and headphone volume controls
