

## ADASTRA DP-8

Šifra: 14832  
Kategorija proizvoda: Pa Rack Ostalo  
Proizvođač: Adastra

**Cena: 26.280,00 rsd**

or power down function is selected. Global voltage and current limit parameters can be set to activate an alarm and/or cut-off when exceeded. Each IEC output has a maximum current capacity of 10A and the total current for the DP-8 is governed by a 32A circuit breaker. Higher power switching is possible by using the IEC outputs to trigger high current 230V relays. Timed and immediate access control for up to 8 groups of mains powered appliances, ranging from rack-mounted equipment to full buildings control.

99 programmable timer switching scenes  
Programmable voltage and current limiter  
Power-up and power-down learning sequence

Up to 32A current across 8 IEC outputs  
USB connection for firmware upgrades

## Specification

ADASTRA DP-8

**DP-8**

## Power Schedule Controller

1U rack-mount digital power control unit for timed switching of 8 mains power feeds. Up to 99 switching scenes can be stored to activate at a specific time on a single day or multiple days of the week. Preset power-up and power-down functions allow the user to record a switching sequence in real time, which is then replayed whenever the power up

Power supply 110-230Vac, 50/60Hz (hard-wired)  
Current max. 32A total  
Contact rating 10A for any output  
Time setting Day(s), hours, minutes, seconds,  
Internal programmes 99 schedule scenes, auto power  
sequence

Outputs 8 x IEC power outlets  
Connections USB port, RS485, 12Vdc out, remote, GND,  
Status  
Dimensions 482 x 250 x 44mm  
Weight 3.0kg
