

ADAstra DP-8

Šifra: 14832
Kategorija proizvoda: Pa Rack Ostalo
Proizvođač: Adastra

Cena: 26.892,00 rsd

or power down function is selected. Global voltage and current limit parameters can be set to activate an alarm and/or cut-off when exceeded. Each IEC output has a maximum current capacity of 10A and the total current for the DP-8 is governed by a 32A circuit breaker. Higher power switching is possible by using the IEC outputs to trigger high current 230V relays. Timed and immediate access control for up to 8 groups of mains powered appliances, ranging from rack-mounted equipment to full buildings control.

- 99 programmable timer switching scenes
- Programmable voltage and current limiter
- Power-up and power-down learning sequence

- Up to 32A current across 8 IEC outputs
- USB connection for firmware upgrades

Specification

ADAstra DP-8 type unknown

DP-8

Power Schedule Controller

1U rack-mount digital power control unit for timed switching of 8 mains power feeds. Up to 99 switching scenes can be stored to activate at a specific time on a single day or multiple days of the week. Preset power-up and power-down functions allow the user to record a switching sequence in real time, which is then replayed whenever the power up

Power supply 110-230Vac, 50/60Hz (hard-wired)
Current max. 32A total
Contact rating 10A for any output
Time setting Day(s), hours, minutes, seconds,
Internal programmes 99 schedule scenes, auto power
sequence

Outputs 8 x IEC power outlets
Connections USB port, RS485, 12Vdc out, remote, GND,
Status
Dimensions 482 x 250 x 44mm
Weight 3.0kg
