Three digital inputs ensure to connect to any source available, be it a personal computer via the asynchronous XMOS USB B input or a TV set via the optical input. The coaxial S/PDIF input takes all data from a digital transport such as the CD Box DS2 T. All inputs offer support for high resolution datas up to 24bit /192kHz. The USB input offers full high resolution support for all files up to PCM 32/768 and DSD256. Unwanted noise coming in through USB is double filtered to suppress them to a level where it can’t affect audio. The new aluminium/metal casing ensures highest aesthetics and protects against vibration and interference!
