Cena: 171.480,00 rsd

Naim Mu-so (2nd Gen) Bežični zvučnik

What Hi-Fi? logo 5 stars

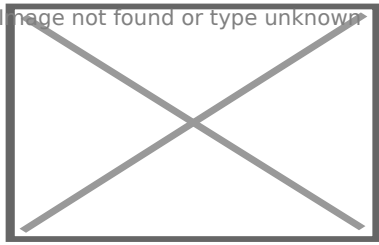

"A superb-sounding, fully-featured wireless speaker that justifies its considerable expense."

Stuff - 5 Stars

'It has more rivals to face than the Mu-so ever did - but those B&W, Devialet and B&O alternatives (to name but three) only exist because of the new ground broken by Mu-so. And Mu-so 2 seems more than capable of maintaining its predecessor's position at the front of the pack.'

T3 - Best Multi Room Speaker Of The Year

'There's increasing competition in the 'premium wireless speaker' market, but Naim Mu-so 2 just crushed it. An awesome, thumping wall of sound and reliable, versatile software platform make for the perfect 21st-century music experience.'

Best Product 2019-2020 - All-In One System

"Naim created a whole new market sector with the launch of its Mu-so: a high quality all-in-one streaming system. With the Mu-so 2nd Generation, it has taken that winning formula and reinvented it, packing in both extra features and more sound quality, utilising completely new drivers co-designed with Focal, making this even more of a one-box solution for room-filling music."

"Naim created a whole new market sector with the launch of its Mu-so: a high quality all-in-one streaming system. With the Mu-so 2nd Generation, it has taken that winning formula and reinvented it, packing in both extra features and more sound quality, utilising completely new drivers co-designed with Focal, making this even more of a one-box solution for room-filling music."

At the heart of Mu-so 2nd Generation is Naim's music-streaming platform, developed by 25 engineers over 3 years to offer the very best performance whether playing your own digital music collection, a world of Internet radio, or music streaming services such as TIDAL and Spotify.

Continuing its high-performance credentials, Mu-so 2nd Generation's 450 Watts of music power are joined by all-new speaker drivers – optimised in conjunction with Focal, the acoustic specialist celebrating its 40th anniversary, and Naim's Vervent Audio associate; more than 10 times more processing power for even greater musical accuracy, and a re-engineered cabinet design to further enhance bass delivery.

Stream your music in high-resolution quality (up to 32bit/384kHz) via UPnP, or browse millions of songs through AirPlay 2 (including Apple Music), Spotify Connect, TIDAL, Chromecast built-in and Internet radio. Upgraded Wi-Fi connectivity promises a slicker streaming experience, while Ethernet remains an option if you prefer things hard-wired. You can also connect devices wirelessly via Bluetooth. Mu-so 2nd Generation's USB input, meanwhile, supports music playback from USB drives.

What's New?

New intelligent controls - All-new intuitive interface has 15 touch sensitive buttons and a bold, illuminated volume dial. A proximity sensor wakes the display.

Multi-room made easy - 3 ways to go multi-room, via Naim, Apple or Google Apps.

More music power - New multicore Digital Signal Processor (DSP) drives higher performance, providing 2000 MIPS (Million Instructions Per Second) compared to original Mu-so's single-core, 150MIPS DSP.

Upgraded speaker drivers - A joint development project between Naim and Focal R&D departments has delivered improved and highly optimised drive units for Mu-so 2nd Generation. Focal has been creating benchmark acoustic equipment since 1979.

Award-winning music streaming technology - Featured in the Uniti range of all-in-one players, Naim's high-end network players and now Mu-so 2nd Generation, Naim's unique streaming platform is extremely powerful and adapts to new technologies.

Improved Bass Performance - Mu-so 2nd Generation has been re-engineered to have a 13% increase in cabinet volume, which enables bigger, better bass performance.

HDMI ARC - An all-new HDMI ARC input lets you easily connect your TV to experience a huge boost in sound quality; and allows audio control via the TV's remote handset.

New Grille finish and colours - Mu-so 2nd

Generation's speaker grille has had a style update. The standard black grille can be easily swapped for one of 3 new colour options – Olive, Terracotta, and Peacock - to best suit your taste and décor.

Chromecast built-in - Google's streaming service allows you to seamlessly link to 100s of supported apps, including Deezer, Qobuz, Plex, TuneIn, SoundCloud and Pandora.

AirPlay 2 - Stream music from your iOS device or from iTunes and Apple Music and take advantage of Apple's new multi-room feature.

Spotify Connect Native support of Spotify Connect, a better way to listen at home. Listen to Spotify on your Mu-so 2nd Generation, using the Spotify app as a remote.

TIDAL The lossless streaming service is integrated into the system for an immersive, high-quality sound experience.

Bluetooth - Pair with a Bluetooth device to instantly play your music.

Internet Radio - Access thousands of internet radio stations and save your favourite presets for easy access.

UPnP Streaming - Stream music from your PC, Mac or network-attached storage in high-resolution quality. Mu-so 2nd Generation supports high-resolution WAV, FLAC and DSD files at resolutions up to 32bit/384kHz.

Roon Ready - Roon transforms the experience of browsing music. Beautifully laid-out metadata is located automatically, then interconnected by links to build a searchable digital magazine about your music collection.

Room Compensation - Choose from three different settings – Near Wall; Near Corner; No Compensation [In Free Space] - to tailor your listening experience to wherever the Mu-so 2nd Generation sits in the room.

Additional connectivity - As well as its new HDMI ARC connection, Mu-so 2nd Generation has a USB input, Optical Digital input and 3.5mm analogue input.

All-new remote control - Mu-so 2nd Generation's premium features and functionality are reflected in its new remote control handset.

Alarm Clock - Mu-so 2nd Generation features an alarm clock which can be enabled via the settings menu in the Naim app.
