The Profile Audio J2P (jack to phono) cable is a high performance compact and flexible stereo phono to phono cable designed to connect your portable or mini hi-fi components equipped with a 3.5mm stereo jack output to your amplifier or receiver phono socket inputs. All QED cables are covered by a lifetime guarantee.

FEATURES AND BENEFITS

Compact Design

Miniature 4 mm outside diameter for high flexibility. Non-directional Figure of 8 construction can be used in both directions.

Ultra-flexible 99.999% Oxygen free copper conductors

Oxygen free conductors are protected from oxidation and will provide a low resistance path for the audio signal for a lifetime

STEPPED JACK PLUG

A specially designed stepped 3.5 mm plug still allows the cable to be used when the portable device is protected by an external case.

Interference Protection

Shielded for enhanced signal protection against external interference

Compact easy grip connectors

24k gold plated plugs and miniature connectors to provide ease of installation with slimline equipment and portable devices

OVERALL PERFORMANCE

eFlex Cordage

Incorporates an Ultra Matte PVC jacket to give the cable ultimate feel and flexibility. Only available in matte black or white

3.5 mm Jack

Jack plug features a stepped profile which means it can be plugged in properly even if the audio equipment is housed in a exterior protective case e.g. iPad, iPhone
