respect of music producers, sound technicians and broadcasters and have established themselves as a firm favourite in studios all over the world.

TESLA TECHNOLOGY

Power and precision are critical requirements when it comes to sound reproduction. The efficiency of our latest Tesla driver technology is characterised emphatically by high resolution and high output power. Brilliant highs, a richly detailed midrange and precise bass combine to ensure a sublime sound quality that is second to none.

Together with the open-back design, the high-resolution Tesla drivers of the beyerdynamic DT 1990 headphones ensure a wide, dynamic and extremely natural stereo image. Titanium-coated acoustic fabric and carefully selected precision-woven textiles round off the balanced sound quality of these dynamic studio headphones.

TWO SOUND CHARACTERISTICS

Choose between a well-balanced sound or deliberately analytical sound tuning thanks to two sets of interchangeable velour ear pads.

OPEN-BACK DESIGN

The open, circumaural design offers a natural and extremely spatial sound. The DT 1990 PRO Tesla headphones' optimized spatial sound reproduction makes them a reliable reference for mixing and mastering applications.

MAXIMUM COMFORT

The perfected design of the DT 1990 PRO combines innovation with decades of expertise in headphone technology.

High-tech textiles and ear pads make the headphones exceptionally comfortable.

They are so comfortable you will almost forget you are wearing them.

ROBUST CONSTRUCTION

Beyerdynamic DT 1990 PRO 250 - Studijske slušalice

YOUR REFERENCE SOUND.

EVERYWHERE.
