ASTON MICROPHONES Origin Black Bundle

Aston Origin

The multi-award winning Aston Origin is a high-performance cardioid condenser microphone utilising a one inch (1") gold evaporated capsule. It's versatile enough to use with any instrument and, for singer-songwriters, excels on acoustic guitar and vocals. Its hand-selected capsule is paired with high-end transformerless circuitry using only the finest components.

The Origin is designed to deliver direct, smooth and intimate sound... for a supremely natural and transparent recording.

Aston Swiftshield

SwiftShield combines the Aston Swift shock mount and the Aston Shield pop filter into one bundle to give you the perfect setup for your studio vocal mic. The Aston Swift shock mount takes microphone mounting to the next level of ease. With 2 quick release spring clips designed to fit the Origin, and a wide range of other mics, from 40-60mm diameter, mounting your microphone takes seconds.

We have reconceived the shock system, and as with all our products worked from the ground up on an entirely new design idea. The 'ShockStar' suspension eliminates the need for fiddly rubber bands, but offers a high level of elasticity for maximum isolation.

Aston Origin

The Origin was our first design, the start of it all, and represents the fundamental essence of the Aston brand.

Beautiful, superb engineering, a sound to rival some of the very best mics in the world... the Origin is the first mic ever made which brings this level of technical excellence and performance to the project studio market.

Origin and Swiftshield - the perfect partners

Aston has become synonymous for innovative and emotive design. Our microphones are not only exceptional recording tools and multiple award-winning products, delivering vocal and instrument recording to rival the very best in the world, but works of engineering art. If you already own an Aston mic, you've already experienced the exquisite attention to detail throughout, as well as the incredible performance.

As standard every Origin comes with a built in pop filter and internal shock mounting system which elevates the performance bar compared to other mics. In many applications you can use the Origin just as it is, but if you want to get the best results possible, and style your mic to look the mutts nuts in your studio environment, then the Aston SwiftShield takes things to a whole new performance level.

The Aston Swift shock mount, is not only elegant, and designed specifically to show off your mic in all its glory with its open-fronted design, but boasts the fastest mic mounting system in the world. Combined with Aston’s internal shock absorbing system, the Swift gives supreme performance in seconds.

The Shield clips on and off the Swift mount quickly and easily when switching between vocal and instrument applications. Utilising Aston’s Hextech perforation acid etching process, the Shield gives excellent plosive (pop) control without affecting the tone of your recordings at all.

The SwiftShield combo is the perfect partner for getting the ultimate performance from your Origin (and it looks awesome too!).

Transducer Type

Condenser

Acoustic Operating Principle

Pressure Gradient

Directional Polar Pattern

Cardioid

Frequency Response

20Hz – 20kHz (+/-3dB)

Equivalent Noise Level

18dB A-Weighted

Sensitivity at 1kHz into 1kohm

23.7mV/Pa

Maximum SPL for THD 0.5%

127dB

Signal-to-Noise Ratio (rel. 94dB SPL)

76dB A-Weighted

Pad Switch

-10dB

Low-Cut Filter

80Hz

Product length

125 mm / 4.92 in

Product width

54 mm / 2.13 in
