

Pioneer DM-40 - Studijski monitor

Šifra: 15159
Kategorija prozivoda: Aktivni Studijski Monitori
Proizvođač: Pioneer DJ

Cena: 17.880,00 rsd

bass from the front, while grooves on the ducts reduce air friction. This way you'll feel a tight bass kick even when the monitors are positioned against the wall.

3D stereo sound

The DM-40's ¾-inch soft dome tweeters are fitted with DECO convex diffusers that channel high frequencies in every direction. So you'll enjoy a wide sweet spot and 3D stereo sound wherever you sit or stand.

Time alignment

Class AB amplifiers deliver a crisp sound with low-distortion. Plus the tweeter and woofer are perfectly aligned to eliminate crossover and ensure a well-balanced response across the frequencies.

Smart design

The cabinets' curved front edges provide maximum rigidity and minimum resonance for a clean sound at all volumes - and they'll look good in your home set-up.

Ease of use

A headphone output and volume knob on the front panel give you flexibility and control, while the RCA and stereo mini jack inputs on the back let you easily connect the speakers to your DJ or production kit.

Specifications

Main Features

Type	2-way bass reflex, active monitor speakers
Tweeter	¾-inch Soft Dome

Pioneer DM-40 - Studijski monitor

features are combined in a compact design making the DM-40 the perfect match for DJing, producing and simply enjoying music at home.

The DM-40 speakers are sold as a pair.

Front-loaded bass reflex system

4-inch fiberglass woofers output a strong, punchy bass from the front, while grooves on the ducts reduce air friction. This way you'll feel a tight bass kick even when the monitors are positioned against the wall.
