Mikrofoni

Proizvođač: Beyerdynamic

Cena: 9.500,00 rsd

A perfect microphone for conference room settings.

The Classis BM 42 is a small condenser boundary microphone with a semi-cardioid polar pattern. The high-quality casing is covered with a proprietary, dust-repellent fabric and the mic's linear frequency response allows for a variety of applications.

The Classis BM 42 can be mounted discretely by placing the microphone on conference tables, lecterns, roundtables or on altars. It also can be used on theatre stages or for live recordings. The integrated high-pass filter reduces low-frequency noise from tables and other sound sources.

The principle of this directional boundary microphone has several advantages. The semi-cardioid polar pattern of the Classis BM 42 provides an excellent gain-before-feedback and reduces ambient noise.

The Classis BM 42 is available in matte black or white.

Features

A perfect microphone for anywhere you need a versatile recording solution

- Semi-cardioid
- High-quality non-glare design
- Linear frequency response
- High gain before feedback
- Reduced diffuse room noise
- Suitable for miking speech
