The MRS10 is equipped with a 10" glass aramid composite woofer that is powered by 120W of Class-AB amplification. It features an adjustable 40 to 180 Hz crossover point for setting the appropriate amount of low end for your acoustic space, as well as a polarity switch to make sure the sub is in phase with your top monitors.

The MRS10 has been designed with flexibility in mind, featuring stereo XLR and TRS inputs, and XLR and TRS outputs. Additionally, the included footswitch bypasses the subwoofer and returns the connected monitors to full range, giving you a flexible option to your monitoring setup. The speaker has been housed in an all-wood cabinet that has vibration-absorbing rubber feet to minimize undesirable resonances.

The MRS10 features a download for ProTools | First software and The Musician Collection plug-in package including 23 high-quality plugins with BBD Delay, Level Lite, 304E EQ, and 304C Compressor. To authorize the software, simply input the mixer's serial number on the website.
