Polyend Tracker - Ritam Mašina

Šifra: 15749
Kategorija prozivoda: Ritam Mašine
Proizvođač: Polyend

Cena: **68.280,00** rsd

Large screen, ergonomic keyboard, and a big knob for fast and easy navigation.

It's standalone and portable – everything you need to produce an album wherever you are.

Sampler, Wavetable and Granular Synthesizer, FM Radio for limitless inspiration.

Powerful Step Sequencer and Song Arranger for finishing your piece in a flash.

Performance mode lets you creatively break, mangle, and augment your patterns when playing live.

Bidirectional MIDI to play with other software and hardware.

Fast track to creativity

Fast trackBig screenMechanical keyboardThe GridThe Knob

Polyend Tracker incorporates the quintessential characteristics of a classic tracker. The vertical timeline, the powerful sequencer and the mechanical keyboard combined with a newly designed input interface enables you to make and perform your music in a new and intuitive way. After a quick glance and a few minutes with the Polyend Tracker interface, you'll soon realize the array of tools that are at your fingertips.

Stay on track

Polyend Tracker is slick, light and portable. It's also easy on the energy consumption so you can use it with any USB power source. Its sturdy and compact form factor makes it a great companion for music creation wherever and whenever you feel like it. No matter if you're in your studio, on the run, or at a gig.

Polyend Tracker is equipped with a variety of powerful sound design tools. Use samples from your existing library, record new ones with line or mic inputs, or use the built-in FM radio. Record samples, play them, slice them, mash them, or even make a synth out of them using Wavetable and Granular synthesis with all its necessary parts (filters, ADSRs, etc.)

The team player

Polyend Tracker works great with other instruments too. Thanks to its bidirectional MIDI implementation you can use it to sequence and control external gear. It can also be used as a sound module controlled by any external MIDI software or hardware devices.
