AIAIAI TMA 2 DRUMCODE EDITION

The DJ

Preset is one of four available preset configurations, offering high isolation and a punchy, bass-focused sound perfect for live performances and electronic music. Personal experiences matter. That is why AIAIAI is committed to providing you with the ultimate in headphone customisation. Replace the drivers, change the headband, it's all part of the modular headphone experience AIAIAI provide.

Customisable modular design

The TMA-2 are designed for a range of musicians. One of the world's first modular headphones, the TMA-2 are fully customisable. You can change everything from the earpads to the headband to the earcups and even the cable.

The headphones are perfect for the modern-day digital musician. For example, the DJ preset provides a combination of the H02 nylon headband and on-ear PU leather earpads. This results in high-isolation and powerful bass response, perfect for live DJ performances.

Custom S80 Drumcode speakers deliver pristine sound

At the core of the headphones are the custom Drumcode S80 40mm titanium-coated drivers. The driver provides high-end audio fidelity with a wide frequency range. It helps to minimise distortion for a clear and focused sound.

The drivers feature an internal vent, delivering a clear mid-range and a punchy low-end. Custom engineered in collaboration with Drumcode, these headphones are perfect for Techno, but will shine across all genres. The injected moulded ABS housing is highly durable, featuring a rubber coating to give it a matte-style look. The plugs feature a cable lock which helps to keep your cable secure at all times.

Designed with DJs in mind

The E02 earpads provide high-end isolation, allowing you to focus on your mixes. The earpads are made from soft-on ear foam cushion with PU leather for maximum comfort.

The H02 is a reinforced injection-moulded headband. It also includes a durable compression moulded silicone headband providing maximum stability and grip. The headband is also easy to clean, ideal for long DJ sets. The gold-plates plug ensure optimal signal integrity and transference, whilst keeping your cables locked in place.

Features

S80 Speaker Units: Custom engineered alongside Drumcode, with a titanium coated driver to reduce distortion. Designed to deliver powerful bass and midrange, perfect for techno but also ideal for any genre.

C02 Cable: Coiled 1.5 meter Thermo plastic cable, soft touch surface and can extend to 3.2m, perfect for Djing or small studio usage - comes with 1/4 to 1/8 screw on

adaptor.

E02 Earpads: Closed and intense sound representation. Produces strong bass and low end dynamics. High isolation.

H02 Headband: New reinforced nylon headband with full grip silicone head padding for better grip.

Adjustable cups: You can easily change the position of the cups to make the headphones fit perfectly.

Cable Lock: You can choose to lock the cable to the speaker unit, to make sure it doesn't get pulled out while playing.

Angled Stereo Plug: This makes it harder to accidentally pull the plug from the mixer, and less intrusive, when you are beat mixing.

Stereo Jack Adaptor: The adaptor lets you change from a stereo mini jack (3.5 mm) to a larger stereo jack (6.3 mm)

Specifications

Driver Unit Size: 40 mm

Rated Power: 30 mW

Max Power: 70 mW

Diaphragm Material: Titanium coated

Magnet Type: Neodymium

Weight: 270 g

Product Code: TMA-2-DRUMCODE
