power.

Controls

Inputs, buttons and knobs are placed conveniently on the top surface of the SRI-2. No need to look down to see what is engaged..

All is clearly in view while recording. LED indicators on all buttons and knobs able you to monitor yours settings even in dimly lit studios.

Ample Power from Headphone output

One of the most powerful headphone outputs in a USB powered device. Create tracks and overdubs with plenty of clarity and power.

Works with headphones up to 250 ohm.

Peak Meter

Clear LED indicators help to clearly see you signal levels to avoid clipping

Record Anywhere

Compact, robust and USB powered. Take it with you anywhere. Use it on the go on your laptop or iPad with the included Cubasis LE Software (with Apple iPad Camera Connection Kit, not included) Includes Cubase LE for windows and OSX

WDM / ASIO / Core Audio

No drivers needed for Windows or OSX. Fluid Audio Windows driver is supplied for an even more flexible setup.

For DAW usage, drivers is needed.

Latency

Direct-monitoring knob provides zero-latency tracking
