4 Selectable Polar Patterns

A desktop stand and a USB cable are included.

2-Channel Mixer Integrated into Stand

A 2-channel mixer is integrated into the stand, so you can connect a guitar directly and record along with your vocals. You can also connect any stereo signal through the auxiliary 3.5mm jack. This form factor is perfect for the multit talented content creator who wants an easy setup and a crystal clear sound.

Onboard Headphone Monitoring

The mic offers a headphone output with an independent volume control for a convenient way to monitor straight from the mic itself. You can also blend between the mic signal and the USB audio, which makes it useful for low-latency monitoring.

Professional-Quality Sound

Onyx preamps are provided to give you crystal-clear quality on vocals and instruments, thanks to its transparent capture and ultralow noise.

Broadcast-Quality Audio Capture

The mic records audio at sample rates and resolutions up to 16-bit / 48 kHz, giving you the broadcast standard for media playback.
