C 544 L

Ergonomically optimized behind-the-neck headband

Moisture shield

Exter
 reject

The C 544 L is a head-worn miniature condenser microphone with a convenient behind-the-neck headband. The microphone has a cardioid polar pattern and therefore “prefers” sounds arriving from the front (from the user’s mouth).

The microphone body containing the condenser transducer is shock mounted on the microphone arm in order to suppress cable and mechanical noise. The microphone arm will place the microphone in front of the corner of your mouth to minimize pop noise and protect the microphone from contamination. The supplied windscreens makes the microphone even less susceptible to wind and pop noise.

A special moisture shield on the microphone capsule makes it difficult for moisture and makeup to penetrate into the microphone. This barrier prevents the microphone sound entries from being clogged by sweat or makeup which would make the sound dull and reduce the sensitivity of the microphone.

Therefore, never remove the moisture shield from the microphone.

The C 544 L is a condenser microphone and therefore needs a power supply.

Type	Pre-polarized condenser microphone
Polar pattern	cardioid
Frequency range	20 Hz to 20,000 Hz
Sensitivity	40 mV/Pa (-28 dBV re 1 V/Pa)
Max. SPL	126 dB / 130 dB (for 1%/3% THD)
Equivalent noise level (IEC 60268-4)	22 dB-A
Impedance	200 ohms, electronically balanced
Recommended load impedance	>2000 ohms

Supply voltage	9 V battery supply through B 29 L or bodypack transmitter, or 9 to 52 V universal phantom power through MPA V L adapter
Powering	approx. 2 mA
Environment	temperature: -20°C to +60°C, R.H. at +20°C: 99%
Cable	1.5 m (5 ft.)
Finish	matte black
Dimensions	130 mm (5.2 in.) in dia.
Net weight	30 g (1.1 oz.) exc. of connector
Shipping weight	200 g / 7.1 oz.

AKG's New C544 L Headset Microphone Combines Clear, Sensitive Response With Comfortable, Convenient Design For Head-Worn Miking Applications

April 2011

“One size fits all” headband
