ULTRASONE Meteor ONE BT Gaming

Gaming on a new level – winning never sounded as great ever before!

Finally: experience the ultimate ULTRASONE sound with wireless freedom. The METEOR ONE offers outstanding acoustics, lasting comfort and ease of use.

More than 30 years of passion and experience in designing and manufacturing headphones, combined with strong partners and cutting-edge technologies, go into our Bluetooth® gaming headset to deliver an unprecedented gaming experience: from the quietest footstep noise to the deepest bass thunder, from action-packed shooter performance to cinematic sound collage, the METEOR ONE offers pure fascination. Splashproof IP54

Crystal Clear Communication

The METEOR ONE features two detachable, unidirectional broadcast-quality microphone arms specifically designed for clear voice communication. Both the wireless and the wired variants guarantee the best voice quality thanks to ENC technology regardless of the state of charge of the battery.

Our gaming headset also features integrated microphones. The microphone arm is then no longer required. These discrete microphones are located in the headset itself and provide clear voice transmission, even when you're on the go.

Uncompromising Sound Quality

Whether extremely quiet step sounds or the deepest bass tones – with the METEOR ONE you hear more of everything. Precisely tuned 40 mm drivers deliver detailed sound. Whether gaming or listening to music.

Maximum comfort thanks to light weight & memory foam

Weighing just 230g, the METEOR ONE is an exceptionally lightweight wireless gaming headset that offers unbeatable comfort and is perfect for long gaming sessions. The collapsible design is ideal for transportation. The extremely soft memory foam ear pads perfectly hug the shape of the head.

Tactical Mode

Extremely low latency by activating the Tactical Mode.

Gaming – and primarily shooters – are extremely fast. To always keep up and maybe even have a tactical advantage, the METEOR ONE supports them with the newly developed gaming mode.

Dynamic RGB – lighting

Customize the look of the headset via the RGB lighting on each ear cup with different color and effect options. Make the METEOR ONE your individual gaming partner.

Scope of delivery

ULTRASONE METEOR ONE Gaming Headphone

Case
