Kategorija prozivoda: Hi-Fi Pojačala za Slušalice

Proizvođač: Naim

Cena: 347.880,00 rsd

and speakers, or active speakers.

## Naim UnitinAtom Headphone Edition

Uniti Atom

Headphone Edition is a headphone-optimised version of the award-winning Uniti Atom music streaming system, designed to be the ultimate solo listening source. Unlike traditional headphone amplifiers and DACs, which require a separate computer or streaming device, Uniti Atom Headphone Edition is a fully formed streaming system: just add headphones. It is also a superb streaming pre-amplifier: simply add a power amp

No disturbance, no distractions, no compromise. City office, home study, living or bedrooms, enjoy your music, at your volume - exactly how it's supposed to be heard. Transform any space into your own audio cocoon, lovingly crafted by the British leaders in high-end sound. Then simply escape to your exclusive world, where music, radio and podcasts have never sounded so good.

#### All In One

Cut the clutter in your listening life by opting for the compact, sleek Uniti Atom Headphone Edition. Where typical headphone amplifiers demand tethering to a computer, the Uniti Atom Headphone Edition has all the brains – and Naim's award-winning streaming platform – built in. Put on your headphones; download the Naim app to your smartphone/tablet and start exploring a world of music-streaming services, radio stations and much more – all in stunning quality.

#### Trickle Down Technology

Uniti Atom Headphone Edition is fully reengineered to offer the optimal personal listening performance. Using trickle-down technology from its flagship Statement amplifier, Naim has engineered a new discrete headphone amplifier, capable of powering even the most premium headphones with ease, via your choice of 6.35mm jack, Balanced XLR or Pentaconn outputs.

## **Lose The Speakers**

Now you don't need to sacrifice sound quality if you don't have the space or lifestyle for a more traditional, speaker-based music system. The Uniti Atom Headphone Edition offers all the features and performance of the award-winning Uniti Atom system, but optimised for headphones rather than speakers.

### Features and Streaming Capabilities

Naim's unique music-streaming platform serves up incredible sound quality, allowing you to escape into your own digital music collection, services such as Qobuz, TIDAL and Spotify, and a world of Internet radio – including a curated collection of HD stations - and podcasts. AirPlay 2 support, Chromecast built-in and Roon Ready status add even more streaming options, while analogue and digital inputs mean you can connect many other sources, too – including turntables – and a USB input supports playback from sticks/drives. Enjoy a huge range of music file formats, in resolutions up to 32bit/384kHz.
