

Primare I15 MM w/ built-in phono preamp Black Integrano Pojačalo

Šifra: 16199

Kategorija proizvoda: Integrisana Pojačala

Proizvođač: Primare

Cena: 167.880,00 rsd

Primare I15 MM w/ built-in phono preamp Black Integrano Pojačalo

MM takes all the sonic goodness of Primare's I15 integrated amp and adds a built-in phono preamp to shine a light on your record collection. In designing their audio components, Primare prioritizes sound quality, but they also pay attention to the way they look and the feel of the controls. Primare components exude the hallmarks of Scandinavian design — everything in balance, proportion, and harmony.

A compact design with big, clean sound

Primare describes the "3/4-sized" I15 MM as an "all analog" integrated amplifier. That just means it doesn't include a built-in DAC for decoding digital music sources, the way Primare's I15 Prisma does. The rear panel provides five sets of stereo RCA inputs for your music sources, plus RCA outputs for connecting an additional amplifier, if needed.

If you're a recent convert to vinyl — or never stopped enjoying it — Primare's built-in MM15 phono stage works with moving magnet (MM) cartridges to complete your analog experience.

The amplifier section delivers 60 watts per channel into 8 ohms, and 100 watts per channel into 4 ohms. That's the rating in the owner's manual, anyway, but once you connect the I15 MM to your speakers, you'll swear the actual power output is higher.

Stylish sound from Scandinavia

Founded in Sweden in the mid '80s, Primare relies on a talented team of designers to create its innovative high-end audio components. Among audiophiles, their equipment is admired both for its exceptional sound quality and its elegant appearance.

Product highlights:

60 watts x 2 channels into 8 ohms (20-20,000 Hz) at 0.02% THD

100 watts x 2 channels into 4 ohms

signal-to-noise ratio: 97 dB (78 dB phono)

4-ohm capability allows use with a wide range of speakers

efficient, cool-running Class D amplifier provides accurate, neutral sound

built-in phono preamp for use with turntables with a moving magnet (MM) cartridge

front-panel OLED display

remote control

Connections:

- 5 stereo RCA audio inputs, including MM phono input
- 2 stereo RCA audio outputs (one line out w/fixed volume for dubbing; one pre-out w/volume control for connecting an amplifier or powered subwoofer)
- gold-plated binding post speaker terminals accept bare wire, banana plugs, and pin connectors
- 3.5mm IR remote control in/out can be used with an optional IR repeater system and compatible Primare products
- 3.5mm 12V trigger output allows the I15 MM to switch on other devices
- RS-232 port for use with home automation control systems, like Crestron
- detachable power cord
