

BEYERDYNAMIC TG 534 606-636MHz

Šifra: 16255
Kategorija proizvoda: Wireless Mikrofoni
Proizvođač: Beyerdynamic

Cena: 69.480,00 rsd

BEYERDYNAMIC TG 534 606-636MHz

WHAT'S IN THE BOX:
TG 500SR (single receiver)
Neck worn microphone TG H34
TG 500B (beltpack transmitter)
1 pair detachable antennas
Batteries
Power supply
Rack mount kit
TG 534

HEADWORN SET

Wireless microphone set, including single receiver TG 500SR, beltpack transmitter TG 500B and an neck worn microphone TG H34.

TG H34

The TG H34 neckworn microphone offers complete freedom of movement and is therefore ideal for speakers and theaters. It is characterized by its easy handling, natural sound and optimal fit. The microphone position can be optimally adjusted with the flexible gooseneck.

TG 500B

The ergonomically shaped beltpack transmitter with a belt clip convinces in practical use with its low weight of only 85 grams. Settings can be made easily on the receivers and transmitted to the transmitters as quickly and easily as possible via infrared synchronization. The integrated pilot tone function ensures interference-free transmission and warns when the battery is running low. The microphone can be muted using the programmable mute button.

With a range of up to 120 meters, TG 500 offers much more freedom than similar systems.

A battery life of ten hours guarantees uninterrupted operation, even during extended events.

As an alternative to batteries, the transmitters can also be operated using standard NiMH batteries which can be charged using the optional WA-CD charging dock without the need to remove them from the devices.

TG 500SR

The heart of each beyerdynamic TG 500 wireless system is an attractively designed receiver with a robust metal housing. Intuitively operating elements in combination with a backlit LC display enable a particularly user-friendly menu navigation. The frequency response of the system is from 45 to 15 kHz. A balanced XLR output and a balanced jack output are provided as analogue audio ports.

RACK MOUNT KIT

When mounting the single receiver into a 19" rack it requires 1 U. The supplied rack mount kit allows two 9.5" devices to be installed in one rack.
