

Q Acoustics M20 HD Wireless Walnut - Bežični zvučnici

Šifra: 16299

Kategorija proizvoda: Wireless Zvučnici

Proizvođač: Q ACOUSTICS

Cena: 56.280,00 rsd

extra components.

High-Resolution Wireless Stereo Experience

Featuring aptX
HD Bluetooth
connectivity for
wireless
streaming of high
resolution-quality
audio (up to 24-
bit/48kHz from
devices such as
smartphones,
tablets, laptops
and network
streamers, the
versatile M20
also features an
array of inputs to
connect a games
console, TV,
Turntable, set-top
box, CD player
and portable
music players
alike. There's also
subwoofer output
in case you need
to really shake
the room. No
matter what you
want to listen to,
M20 can handle
it. Drawing on

Q Acoustics M20 HD Wireless Walnut - Bežični zvučnici

Designed to deliver stunning wireless high-resolution stereo sound, the flexible M20 HD audio system from Q Acoustics is the most powerful and immersive and way to enjoy music, movies and gaming sound anywhere in the home. One powered and one passive speaker form a stereo pair, guaranteeing a focused, punchy stereo sound, and a wide accurate soundstage for which Q Acoustics is famous. With the pre and power amp onboard dispensing 64 watts digital power, the M20 offers neat wireless audio solution without the clutter of

audio innovations
from our award-
winning passive
speakers, the
M20 harbours
advanced driver
technology,
proprietary
internal P2P
(point to point)
cabinet bracing
and an elegant,
classic design to
create an
affordable high-
resolution
wireless stereo
experience like
no other.

Immersive Sound For Music, Movies And Gaming

Whether listening
to music,
watching TV or
movies or
gaming, the
M20's advanced
driver technology
is designed to
produce low-
distortion,
accurate but
highly immersive
stereo sound.
Powered by a
built-in amplifier
providing 64
watts of digital
power, the 22mm
tweeter is
decoupled to
minimise any
internal
vibration's that
can adversely
affect the audio,
while the 125mm
mid/bass driver
and rear-firing
reflex port in
each speaker
combine to
deliver a sound of
outstanding
balance and

drive. From deep but nuanced low-frequencies to its crisp, attacking highs, and with a midrange that's simply packed with information, the M20 is always a dynamic but poised and engaging listen.

Always The Right Place

It's easy to set-up the M20 so the system is always performing to its maximum, no matter where it is in the room. As well as being able to designate the powered speaker as either the left or right channel (to make accessing mains power as simple as possible), there's also an EQ switch to let the system know if each speaker is positioned in a corner, against a wall or in free space so its digital sound processing can work its magic and optimise the audio performance. And with stands and wall-brackets also available, M20 will always bring your music, movies and games to life wherever it is placed.

Shaped To Sound Better

Featuring award-winning cabinet technology, every element of the M20's design is specified to deliver an optimal audio performance. The beautifully

sculpted cabinets use Q Acoustics proprietary P2P (point to point) bracing to support the parts of the enclosure that need to be stiffened. The result is an exceptionally rigid cabinet that eliminates internal standing waves to improve the focus of the stereo image and give the soundstage more accuracy than ever before. The grille's curved contours are also designed to disperse any tweeter activity, keeping unwanted reflections to a minimum.

**Powerful
And
Immersive
Stereo
Sound
For
Music,
Movies
And
Gaming,
Anywhere
In The
Home**

Features aptX Bluetooth connectivity for wireless streaming of high resolution-quality audio (up to 24-bit/48kHz) and native 24bit/192kHz compatibility via a USB connection to a computer.
