The phenolic diaphragm assembly, with its 1 inch edge-wound aluminum voice coil, is capable to handle up to 40W continuous program power for temperature range up to 250°C.
Computer Aided Finite Element Analysis and extensive testing were used to obtain phase plug shape made in high pressure injectionmolded polypropylene foam, designed to assuring maximum strength. Final result is a smooth coherent wavefront in the horn entrance, high thermal stability and manufacturing consistency.
The HD110 compact size and lightweight ceramic magnet assembly is designed to obtain 16KGauss in the gap.
