

# Eighteensound TWEETER XD125 8ohm - Visokotonac

Šifra: 16349  
Kategorija proizvoda: HF Driveri (Visokotonci)  
Proizvođač: Eighteensound

Cena: 10.680,00    **rsd**

Nomex former, thanks to its physical properties, shows 30% higher value of tensile elongation at working operative temperature(200°C) when compared to Kapton. This plus is capable to keep properly energy transfer control to the dome in real working conditions. Moreover, Eighteen Sound voice coil proprietary Nomex former is suitable to work also in environments with higher moisture contents. The polypropylene phase plug is the result of a meticulous design exercise. Its shape assures the correct acoustic impedance of the radiating dome, reducing distortion levels across a very wide range of frequency. Final result is a smooth coherent wavefront in the horn entrance, high thermal stability and manufacturing consistency. The compact and lightweight ceramic magnet assembly has been designed to obtain 16KGauss in the gap. The XD125 pressure die-cast polyurethane foam horn maintains constant nominal 90° Horizontal x 60° Vertical pattern control, providing consistent on-axis and off-axis frequency response from 2kHz to 16kHz in the horizontal plane and from 2,5kHz to 16 kHz in the vertical plane. Horn directivity is constant from 2,5kHz. Computer Aided Finite Element Analysis and extensive testing were used to obtain the horn contours. Horn is designed to be free of resonance and vibrations assuring maximum strength.

- 1 inch exit throat
- 108 dB SPL 1W/1m average sensitivity
- 25,4 mm (1 in) edgewound aluminum voice coil
- 50 Watt program power handling
- Low weight, easy mounting and handling structure
- Usable in two way or multiway systems
- 90° x 60° coverage Constant directivity pattern
- Unique Eighteen Sound elliptical shape

## General

Product type

Horn+driver

Brand

Eighteen Sound

Reference

XD125

Eighteensound TWEETER XD125 8ohm - Visokotonac

This design maintains the minimum resonance frequency point value at 1600Hz, extending the frequency response in the mid region when compared to previous compression driver model, the XD120. The design of diaphragm and surround in polyester material allows better control in terms of movement and mechanical stress. Radial ribs increase stiffness avoiding uncontrolled vibration modes in the usable frequency range. An edge-wound aluminum voice coil, wounded on proprietary treated Nomex, completes diaphragm assembly. Proprietary treated

Product code	DRV10D125PO08FD - 0421M8X110
<b>Informations</b>	
Nominal impedance	8 ohm
Manufacturer sensitivity	109 dB
Nominal power handling	25 W
Max power handling	50 W
Bandwidth	2000÷18000 Hz
Recommended min cutoff frequency	2500 Hz
Exit dimension	1.0 inch
<b><u>Datas</u></b>	
Flux density	1.65 T
Zmin	8 ohm
Weight	~1.1 kg
<b>Dimensions</b>	
Voice coil diameter	1 inch
<b>Shape &amp; Materials</b>	
Front chape	Cylindrical
Magnet type	Ferrite
