This new record puck ensures a secure fit between record and turntable. With the two different finishes, black painted and polished silver, it perfectly fits the design of our turntables. Record pucks use weight to secure a playing vinyl record against the turntable platter. By holding the two together, the sound performance of the turntable will improve, in timing and depth of sound. With a weight of 190 grams, this puck is perfect for smaller turntables in order not to burden the turntable bearing and to prevent an increase in rumbling.

**Check the spindle height:** The spindle height with applied record shall not exceed 10,5mm!
