

Primare A35.2 Pojačalo Snage

Šifra: 16411
Kategorija proizvoda: Pojačala Snage
Proizvođač: Primare

Cena: 239.880,00 rsd

Primare A35.2 Pojačalo Snage

Technology

A35.2 is the most powerful amplifier we have designed using our new proprietary UFPD 2 analog class D amplification technology.

In fact, a completely new UFPD 2 power module was designed to provide the power and performance we felt necessary for such a statement stereo amplifier.

As a result, a completely new power supply, with custom wound transformers, was designed to deliver the immense electrical power needed for the amplifier module to produce the immense amount of musical power of which it is capable.

With that essential circuitry in place, A35.2 is capable of providing immediate and sustained high power output with very low distortion, instantaneous rise time and absolutely linear amplification across the entire bandwidth resulting in a naturally fast, clean and agile sound over an ultra-wide frequency range and with exceptional headroom.

A35.2 features balanced inputs and 200 watts of output power into 8 ohms, with the ability to be bridged to mono for 800 watts of output into 8 ohms. With this level of truly massive power output, A35.2 is capable of driving even the most demanding stereo speakers, or for an awesomely powerful multi-channel system array.

The look and feel of Scandinavia

We believe that every aspect of our products – the way they look, the satisfying feel of the controls – contributes to the overall experience of living with Primare. As a result, Primare products exude the hallmarks of Scandinavian design – simple, elegant designs, with approachable and easy to understand functionality.

An example of this is the standby button discretely placed within the Primare logo on the faceplate of our R15, R35 and A35.2 models – or as we say lagom, not too much not too little, everything in balance, proportion, and harmony.

Modular Design and System Building

We feel it is essential to offer modularity whenever possible in order to have just the right features, both now and for the future. Modular design is featured in the I25 and I35 integrated amplifiers, as well as the PRE35 preamplifier, all of which can be updated with DAC and Prisma modules, as well as the CD35 CD player that can have the Prisma module added, either at the time of purchase or at a later date. As a result, we are able to offer a carefully considered array of models and configurations in order to allow for device selection that best fits any system need. The A35.2 is the obvious partner for the PRE35 in its various configuration, and while not modular itself, it does allow for a number of configuration options to fit system needs, either as a single stereo amplifier, or as a pair for use in bi-amping or in bridged mono mode for 800 watts of pure power per channel.

UFPD 2 Output power

2 x 200W 8 ohms / 2 x 400W 4 ohms

XLR

1 x stereo pair inputs

RCA

1 x stereo pair inputs
12V Trigger
2 x 3.5mm input/output
RS232
outboard system control port
Dimensions
430 x 400 x145 mm (wxdxh)
Weight
11.7 Kg
Finishes
black or titanium
