

BEYERDYNAMIC MMX 100 Grey 32 Ohm

Šifra: 16725

Kategorija proizvoda: Headsets i Gaming

Proizvođač: Beyerdynamic

Cena: **11.880,00** rsd

Clear and precise sound on studio level

Natural vocal transmission with low ambient noise thanks to detachable META VOICE microphone

Best compatibility with PC, XBOX, Playstation and Nintendo Switch with volume control wheel and separate mute switch for intuitive operation

Excellent wearing comfort throughout many many hours of gaming

Detachable microphone, cable and replaceable spare parts for durability

MMX 100 - META PICK - ALWAYS YOUR RIGHT CHOICE

In gaming, every day is different. And yet, there is an easy way to choose the best champion – with the META PICK. With the MMX 100, it's the perfect combination of high-resolution sound and cross-platform compatibility that makes the MMX 100 the

META PICK for every console lover.

PROFESSIONAL SOUND FOR A COMPETITIVE ADVANTAGE

Our beyerdynamic drivers are the meta pick in premium studio-quality sound. That much is proven by the MMX 100's high-resolution sound. The 40mm drivers built into the MMX have been specially optimised for gaming by our acoustic engineers.

This results in a clearer and more precise sound that can be heard across all genres: in FPS games you profit from a precise sound localisation, which gives you a notable advantage in a range of situations. RPGs feel even more realistic thanks to the distinct sound.

META VOICE MICROPHONE STUDIO-LEVEL GAMING

Loud background noises in the chat break a team's immersion and focus. In gaming, the stakes are high and it's important for your voice to be transmitted naturally with a minimum of background noise. We have translated our years of studio experience into the world of gaming to set our benchmark for studio-level gaming. The answer is the new META VOICE cardioid condenser microphone, which features a 9.9 mm capsule to reproduce your voice naturally and true to life. However, typical background noises like keyboard clacks and mouse clicks will be eliminated.

VOLUME DIAL AND MUTE BUTTON

Never again will you have to waste time searching along your cable! A practical volume dial ensures the MMX 100 can be adjusted quickly and precisely. Intuitive controls mean you can adjust the volume without leaving your game. And the microphone can be muted using the separate mute button.

SOPHISTICATED DESIGN FOR HOURS OF COMFORT

The MMX 100 combines the classic beyerdynamic aesthetic with a functionality that really matters in gaming. The aluminium band holds the headset together and guarantees durability and a premium look. To prevent pressure points on the head, the band is fitted with memory foam cushioning encased in artificial leather. The memory-foam-filled artificial leather ear pads guarantee comfort for hours on end, and they can be swapped even more quickly and easily thanks to a bayonet mechanism.

TECHNICAL SPECIFICATIONS

Headphone

Transducer type Dynamic
Operating principle Closed
Sound coupling to the ear Circumaural
Frequency response 5 - 30,000 Hz
Impedance 32 Ω
Max. sound pressure level @1 mW / 500 Hz 116 dB SPL
T.H.D.. < 0.5%
Headband pressure 4.5 N
Length and type of the cable Analogue: 1.2 m (3.9 ft) /
detachable / straight cable
Analogue: 2 m (6.5 ft) / detachable / straight cable
Connection Analogue: 5-pole mini jack (3.5 mm)
to 4-pole mini jack (3.5 mm)
Analogue: 5-pole mini jack (3.5 mm)
to 2 x 3-pole mini jack (3.5 mm)
Weight (headphone) 296 g (10.44 oz)
Microphone
Transducer type Electret condenser
Capsule diameter 9.9 mm (0.39")
Polar pattern Cardioid
Frequency response. 5 - 18,000 Hz
Max. sound pressure level 118 dB
Signal-to-noise ratio 67 dB

FEATURES

- Closed gaming headset
- Ideal for controllers and sound cards
- META VOICE microphone for professional sound
- High wearing comfort due to memory foam in ear and headband pads
- Soft, replaceable ear pads
- Single-sided, detachable cables

SUPPLIED ACCESSORIES

- 1 x 5-pole to 4-pole jack cable (3.5 mm), 1.2 m, to connect to combination sockets such as consoles, external sound cards, notebooks, tablets etc.
- 1 x 5-pole to 2 x 3-pole jack cable (3.5 mm), 2 m, to connect to PC sound cards with separate microphone and headphone sockets
- 1 x pop shield for the microphone
