

PRO-JECT Connect It Phono 5P CC 5 Pin DIN to Phono 1,23m

Šifra: 16740
Kategorija proizvoda: Hi-Fi Analogni kablovi
Proizvođač: Pro-Ject

Cena: **17.880,00** rsd

The Project cable range has been optimised for use with turntables. The Connect-IT 5P CC tonearm cable is an electrically shielded cable made with pure Oxygen Free Copper (OFC) conductors with an additional layer of carbon fibre and is highly flexible with low capacitance and a perfect shield.

All Pro-Ject cables have been developed to have low colouration and are handmade in Europe. State-of-the-Art components for leads, dielectric and plugs were chosen only after intense listening tests ruled them the best. Specific lengths were chosen because of their significant advantages when carrying audio signals.

The 5P-CC cable is a great cable option for linking a turntable tonearm directly to a phono stage, on compliant turntables. It uses the standard 5-Pin DIN connection, and the cable is found as standard on various high-end turntables, such as the 6 Perspex and Xtension 10.

Project Connect-IT 5P CC 5 Pin DIN to Phono Tonearm Cable features
Interconnect cable with earthing wire
2 x RCA phono plugs
1 x 5-Pin DIN standard tonearm socket
Made from oxygen free copper
Electrically shielded
Sold in 123cm length
