

CASIO Privia PX-S6000BK Električni Klavir + Gratis slušalice

Šifra: 16894

Kategorija proizvoda: Stage Električni Klaviri

Proizvođač: CASIO

Cena: **179.880,00** rsd

The Privia PX-S6000 is equipped with a large LED touch ring, bright backlit LCD display for easy navigation, and a microphone input with DSP effects to capture your vocals. Easy-to-use performance features include an arpeggiator function, two assignable control knobs, and a pitch-bend wheel to manipulate your sound in real time. The USB audio/MIDI interface and onboard MIDI and audio song recorders allow composers to capture their performances on the fly. The included WU-BT10 adapter adds Bluetooth wireless connectivity, allowing you to use the Casio Music Space app or the speakers to play music from a smartphone or tablet. Two headphone jacks are provided for quiet practice alone or with a partner. For portability and convenience, the piano can be powered either via eight AA batteries or the included power adapter.

The PX-S6000 comes with a music rest and an SP-3 sustain pedal. Optional CS-90P matching stand and SP-34 three-pedal unit are available separately to transform your PX-S6000 into an elegant, compact grand-piano replacement. Also available separately is the stylish and comfortable CC-7 wooden stool, built in collaboration with the renown Japanese interior-decoration company Seki Furniture—sure to complement any room.

A Portable Grand Piano for Your Home

Modern, minimalist design with luxurious gloss-black and walnut-wood grain finish

88 weighted keys with Smart Hybrid Hammer Action Keyboard (key material: hybrid of wood and resin) for grand-piano touch

Ivory- and ebony-textured key surfaces for grand-piano feel

Multidimensional Morphing AiR Sound Source technology for authentic piano sound

Acoustic-piano simulator: Hammer Response, Key Off Response, String Resonance, Damper Resonance, Open String Resonance, Aliquot Resonance, Key Action Noise, Damper Noise, Key Off Simulator

350 instrument sounds including a legendary Hamburg concert grand piano and 30 vintage electric pianos

100 built-in DSP effects to lend additional character and effects to the sounds

20 drum patterns for accompaniment + metronome

256-note polyphony

32W spatial sound system with four independently driven full-range speakers

Piano Position functions adapt the sound of the piano to the acoustics of its location (Standard, Wall, Table, Center modes)

Flat console panel with illuminated touch-sensor controls with assignable multifunction buttons

LED touch ring and bright backlit LCD display for easy navigation

Illuminated pitch-bend wheel and three assignable buttons

Microphone input with volume control and 25 dedicated microphone DSP effects

Includes WU-BT10 Bluetooth audio and MIDI adapter

1/4" L/R instrument outputs

Dual headphone outputs (3.5mm TRS and 1/4" jacks)

Expression pedal input for optional SP-34 3-pedal unit

Class-compliant USB port with no drivers or installation needed

2-track MIDI recorder

USB audio recording

Audio/MIDI file playback

2-way power: 4-hour operation with 8 AA batteries or unlimited operation time using the included AC adapter

Designed to work with the Casio Music Space app for iOS/Android

SP-3 sustain pedal is included

Beautiful All Around, Harmonious in All Environments

The PX-S6000's gloss-black and walnut-wood grain finish complements any interior design style. In order to achieve all-round smoothness, the back of the piano is lined with speaker fabric, which also covers the speakers and gives the piano a sleek look even from the back.

The top panel is a shining example of elegance and simplicity. A touch ring that allows easy scrolling and directional input complements the easy-to-read backlit display, illuminated touch sensor controls and color-changing pitch bend wheel. Four multifunction, context-sensitive buttons let you quickly access your favorite sounds and settings.

The Smooth Touch of a Grand Piano

The PX-S6000 delivers the genuine touch of a grand piano thanks to the Smart Hybrid Hammer Action Keyboard, which faithfully conveys the nuanced expressions of the player. This mechanism digitally controls the sound response generated by each key and has been designed to have the same hammer feeling as a grand piano. Each of the individual 88 keys has a unique and delicate touch, depending on the keyboard range and how it is played.

The white keys are made from a hybrid structure that uses spruce in addition to resin; and the white and black keys replicate the ivory and ebony texture, enabling the same feel as when you play a grand piano.

Authentically Captures the Sound of a Grand Piano

The PX-S6000 delivers the experience of owning one of the finest piano on Earth—dubbed Hamburg.

The piano has its own unique personality and the Multidimensional Morphing AiR Sound Source brings it to life with damper, string, and aliquot resonance, plus subtle mechanical sounds.

A Myriad of Sounds at Your Fingertips

30 electric piano Tones are also included, featuring brilliant tine, reed, and other classic instruments. While exploring the 350 built-in sounds and their brilliant DSP effects, you'll find many that are designed to cover the keyboard parts of timeless world-famous songs.

Eight types of Hall Simulation place your PX-S6000 in a virtual concert space, and Casio's unique Surround mode places you right in the center of your music.

Cutting-Edge Spatial Sound System

The PX-S6000's 32W, 4-way Spatial Sound System delivers rich, room-filling sound from behind a sleek fabric cover. These speakers are meticulously tuned to resonate within the PX-S6000's wood and resin body. They are equipped with Side Enhancing Diffusers that help produce a wider sound despite the compact size of the piano.

Using the Piano Position function, you can configure the Spatial Sound System to sound its best when placed against a wall, in the center of a room, on a table, or anywhere else in your home.

Enhanced Headphone Mode

Two headphone jacks allow for quiet play at any time.

Headphone Mode automatically optimizes the sound for listening through headphones, creating a more natural listening experience as if the sound were playing through the speakers.

Real-Time Expression with Ease

The PX-S6000 offers a wide range of DSP effects and Tone Modify functions for refining your sounds. The Arpeggiator function can automatically provide arpeggio patterns depending on the music you are playing and give assistance to the player.

The piano is equipped with two control knobs, a pitch-bend wheel, and expression pedal input. Using these, you can control parameters such as filter cutoff frequency, resonance, attack and release times, arpeggiator, and DSP effect parameters in real time with a single touch and enjoy dynamic changes to add expressivity to your performance.

Bring the Live Performance to Your Room with Wireless Functions

The included WU-BT10 Bluetooth audio and MIDI adapter lets you connect to a whole world of MIDI software including the Casio Music Space app and allows you to stream your favorite music through the built-in speakers.

Personalize Your Experience with The Casio Music Space App

Casio Music Space is a free app exclusively for Casio digital piano and keyboard users. When running on iOS or Android devices connected to your Casio piano via USB, the app acts as digital musical score, a music teacher, a live-performance simulator, and as an all-around app to enjoy learning and playing music.

The app is for complete beginners, people taking up an instrument again, and anyone who wants to experience a new way of playing. Expand your enjoyment of music by watching, listening, and playing through the app.

MIDI Recorder Function

MIDI recorder allows you to capture your playing as MIDI song data, which can be played back from the Digital Piano—perfect for piano lessons and practice.

Data can also be saved to a USB flash drive as a standard MIDI file (SMF) for later playback or for use with a DAW or other electronic musical instruments.

Plug In a Microphone and Record Your Performance

The 1/4" microphone input allows you to connect a microphone, so you can sing along while you play. Hear your voice through the instrument's speakers, and even record your performance to USB audio.

Take Your PX-S6000 Wherever the Music Takes You

The PX-S6000 can be played anywhere, thanks to its optional 8 x AA battery power.

Optional CS-90P matching stand and SP-34 three-pedal unit can be connected for portable piano authenticity, and the optional SC-900 carrying bag lets you bring your PX-S6000 wherever the music takes you.
