Kategorija proizvoda: Soundbarovi  
Proizvođač: Bowers & Wilkins

**Cena: 83.880,00 rsd**

### in any environment

#### Immersive sound from a single speaker

Thirteen individual, painstakingly positioned drivers, including twin subwoofers, powered by a total of 400 watts of amplification. This is what allows Panorama 3 to deliver the most immersive, most convincing spatial audio ever heard from a sound bar.

#### Because you want sound all around you

Thanks to upward-firing drive units, each housed in an individual acoustic chamber, Panorama 3 projects tightly focused sound upwards onto your ceiling to deliver the truest, most immersive Dolby Atmos spatial audio effect.

#### Connected, smart, intuitive and effortless

Enjoy Bluetooth aptX™ Adaptive, AirPlay 2, a host of streaming services and hi-res audio too.

#### Easy to set up, simple to use

The intuitive app ensures easy network set-up, and HDMI eARC means simple connectivity.

#### All the sound you need from one elegant component

In addition to twin Dolby Atmos units, Panorama 3 has nine more drivers and two subwoofers. Outstanding performance is assured.

### Size & weight
