Zoom BTA-1 Bluetooth adapter

The

Zoom BTA-1 is a Bluetooth adapter designed to allow wireless control of your ARQ AR-48, LiveTrak L-20, Zoom F6, R20, or H3-VR for enhanced convenience at the studio, in the field, or on stage. Its compact housing fits neatly in your device without obstructing access to other ports. Once configured, it allows wireless control from a distance of up to 32.8 feet.

When connected to an ARQ AR-48 (available separately), the BTA-1 enables use of the AR-48 for wireless control of your MIDI instruments and devices connected to your computer—samplers, synths, and drum machines, as well as MIDI-enabled effects processors

When connected to a LiveTrak L-20 (available separately), the BTA-1 allows wireless control via a free iOS mobile app featuring most onboard functions including fader levels and modes, scenes, EQ, EFX sends, returns, parameters, and more

When connected to an H3-VR (available separately), the BTA-1 offers wireless control via a free iOS mobile app featuring transport controls, level settings, and metadata notes

When connected to a Zoom F6 (available separately), the BTA-1 offers wireless control via the free F Control iOS mobile app featuring signal monitoring, transport controls, level settings, and metadata notes
