

## KEF KC62 Powered SUB Titanium Grey - Aktivni vufer

Šifra: 17434

Kategorija proizvoda: Hi-Fi Subwooferi

Proizvođač: KEF

**Cena: 203.880,00 rsd**

Afraid your audio system will take up too much room? Not to worry. With its largest dimension extending to a mere 25.6cm, the KEF KC62 is an ultra-compact, ultra-convenient subwoofer that achieves excellent bass without taking up living room space. Enjoy robust audio with the KEF KC62's 1000W RMS peak power, supplied by an efficient Class-D amplifier. With the five pre-set Room Placement Equalisation features, the KEF KC62 delivers optimised performance regardless of its location, whilst the curved aluminium cabinet assimilates seamlessly with your decor.

### **Stereonet Product of the Year 2021 - Subwoofer**

**"It looks great, doesn't take up much space (at 246x256x248mm) and packs 1kW of power from twin 500W Class D power amps. Its strong, light magnesium cabinet is a work of art, and it's a highly effective bass maker, punching out up to 105dB of tremulous low frequencies despite those diminutive dimensions."**

### **Powerful Drivers**

The KEF KC62 subwoofer is harnessed with two 6.5" (165mm) force-cancelling Uni-Core drivers which produce thrilling, clean bass that enhances your entertainment. Envelop yourself in the sound with KEF's P-Flex pressure-resistant surround design. Inspired by the art of origami, this combats the effect of acoustic pressure in the enclosure without reducing sensitivity. The KEF KC62 also uses Smart Distortion Control Technology which is capable of reducing THD by an impressive 75% by measuring current in the voice coil.

### **Thrilling Audio**

The low-frequency performance is enhanced even more by KEF's Music Integrity Engine, which offers an array of Digital Signal Processing algorithms. These include iBX (Intelligent Bass Extension) and SmartLimiter, which ensure you get the most dynamic sound possible. The five Room Placement settings will further optimise your system. Relish robust bass with a 1000 RMS total power output generated by an efficient Class-D amplifier capable of varied sound with an 11Hz - 200Hz frequency response.

### **Great Connectivity and Design**

Integrate the KC62 into almost any audio system. Either through SmartConnect or speaker-level inputs (with options for Line output and a High Pass Filter), create the ultimate listening experience. Along with crossover and volume control on the rear panel, the switchable Room Placement Equalisation lets you quickly adjust this subwoofer for common environments and placement positions. The minimalist design is visually appealing, whilst maximising audio performance in your speaker system.

**Key Features**

Compact design ensures that the subwoofer doesn't take up too much room whilst still delivering excellent bass extension

Two 6.5" (165mm) Uni-Core force cancelling drivers offer excellent sound

P-Flex pressure-resistant surround design sharpens bass response

Smart Distortion Control Technology ensures that the audio signals remain as dynamic as possible

Music Integrity Engine provides DSP algorithms such as iBX and SmartLimiter

Class-D amplifier provides up to 1000 RMS power output

11Hz - 200Hz frequency response and 105dB max output create a diverse sound

Multiple inputs/outputs enable connectivity to a variety of audio devices

Room Placement Equalisation allows the subwoofer to offer the same audio performance regardless of its positioning or environment

**What's in the box?**

The KEF KC62 Subwoofer

1 x Power cable

1 x Speaker input adapter
