PRO-JECT Phono Box DS2 Silver Gramofonsko Prepojačalo

DS2 is a highly adjustable phono pre-amplifier suitable for all common MM and MC cartridges. With the ability to switch easily between input impedance and capacitance, as well as gain on front it becomes one of the most user friendly phono stages at this price point. It features one pair of RCA inputs for your turntable and one pair of RCA outputs which will be connected to your pre-amplifier or integrated amplifier. The casing is made of a durable aluminium metal sandwich construction, which not only will effectively protect it against

electromagnetic interferences and vibrations, but will also please the eye with its simple and elegant esthetics. Phono Box DS2 features a very linear circuit design to deliver the best possible sound from a minimalistic PCB. With its high value sonics and low cost price it becomes an audiophile bargain!
