Šifra: 17490
Kategorija prozivoda: Hi-Fi Subwooferi
Proizvođač: Bowers & Wilkins

Cena: 359.880,00 rsd

More bass, less space
Compact model packs a mighty punch. Controllable, dramatic bass from a subwoofer so small it fits almost anywhere: DB3D is a space-saving high-performance design.

Nimble and powerful
Solid, dramatic bass is delivered through the rigidity and lightness of the uniquely-shaped, variable thickness Aerofoil™ cone.

A question of balance
The back-to-back (opposed) drivers cancel out cabinet resonances, ensuring all that power is used to create room-shaking bass, not wasted vibrations.

The digital advantage
Digital amplification is cool-running and energy efficient, even when working hard, while Dynamic EQ and Room EQ ensure a precise sound for music and movies.

Take control
By placing control in the palm of your hand, our subwoofer app not only makes our DB Series subwoofers a snap to set up, it also helps maximize your sound quality.

Completely belying its compact dimensions, the DB3D is a miniature powerhouse and plumbs depths of LF that no box of these dimensions has any right to. The performance is super-tight, very fast and carries a weighty punch with LFE and two-channel stereo music alike.
