

Polyend Tracker Mini

Tracker, but more

Šifra: 17810
Kategorija proizvoda: Ritam Mašine
Proizvođač: Polyend

Cena: 71.880,00 rsd

We've refined the signal path to provide more headroom and pristine stereo audio playback. Additionally, we've added genre-specific sample packs pre-designed by professional artists to help you get started making music faster. The sampling time has been increased to four times the capacity

of the original Tracker, and per track audio over USB and USB MIDI make it perfect for hybrid setups. You can add individual track effects, record directly to your laptop, or mix and master in your DAW. The included travel case will keep your Tracker safe while you do what you love in new places.

Studio in your hands

Tracker Mini has all the necessary tools to create an album, whether you want to start with the included sample pack or record your own. You can convert samples to instruments, control external devices, create simple or complex compositions, mix tracks, master, and export songs. The Mini has got you covered.

Breathe life into your tracks

Equipped with a high-quality microphone and an onboard battery that provides up to 8 hours of playtime, the Tracker Mini enables you to instantly transform your surroundings into a musical canvas. You can create a sample pack from a camping trip or craft a drum kit from your morning commute. Store your sonic memories, get inspired, and leave the studio behind.

Capable and compatible

Projects created on the original Tracker are fully compatible with the Mini, allowing you to start a song in the studio and finish it on the go.

Tracker Mini has a complete MIDI implementation, enabling you to control any external gear or use it as part of a larger setup. For greater convenience, you can also connect it to a MIDI keyboard to input notes.
