

## Electro Harmonix OP Amp Big Muff Pi Fuzz / Distortion / Sustainer

Šifra: 18042

Kategorija prozivoda: Pedale

Proizvođač: Electro Harmonix

**Cena: 11.880,00 rsd**

Electro Harmonix OP Amp Big Muff Pi Fuzz / Distortion / Sustainer

**Circuit:** Analog

**Bypass:** True Bypass

**Audio:** Mono

**Power Supply:** 9V battery included (optional 9.6VDC-200mA power adapter not included)

**Dimensions (in):** 4.5 x 2.75 x 2.1

**Current Draw:** 5mA

**Year Released:** 2017

With original late-70s Op-Amp Big Muffs selling for exorbitant prices, Mike Matthews decided to take

the power to the people and reissue the classic pedal at a price that players could afford! The circuitry of the new EHX Op-Amp Big Muff Pi —sometimes also referred to as the IC or V4 Big Muff— has been faithfully re-created while several practical enhancements have been added including a compact, die-cast chassis and true bypass switching.

“The Op-Amp Big Muff was popularized by the brilliant Billy Corgan who first used it on the Smashing Pumpkins’ epic 1993 album Siamese Dream. After he was videotaped playing and talking about the reissue, Billy stated: ‘The magic’s still in the box, I can still get what I’m looking for!’” – Mike Matthews

The pedal relies on op-amps rather than transistors and three gain stages rather than four, to create its signature sound. It’s a sound that’s been described by noted Big Muff collector and historian, Kit Rae, as: “a huge, crushing Big Muff sound with more crunch... great for grungy, wall-of-sound distortion, heavy rhythm playing and heavy leads.”

A faithful reissue of the original classic circa 1978

Iconic sound and vibe that’s coveted by guitarists

Controls for Tone, Sustain and Volume, plus a Tone Bypass switch

True bypass switching for maximum signal integrity in bypass mode

Rugged, compact, die-cast package... pedalboard friendly

9V battery included
